STANLEY BALDWIN **ELECTED LEADER** OF CONSERVATIVES

Premier Confident Party Unity Will Soon Be Achieved-Mr. Chamberlain Explains

By Cable from Monitor Bureau LONDON, May 28-Stanley Baldwin, the new Premier, was elected leader of the Conservative Party, at a meeting at the Hotel Cecil today. Marquess Curzon, who presided, relinquished the chair temporarily to make the nomination in a striking speech in support of Mr. Baldwin's leadership, which aroused enthusiasm. Prior to these proceedings a vote of thanks to Mr. Bonar Law was passed, Mr. Bald-win deplored the talk of disunity and expressed confidence that complete unity would soon be achieved.

. Mr. Baldwin and his new Min-istry go before the House of Commons this afternoon, when it re-assembles after the Whitsuntide recess. The new Premier will receive the hearty greeting which the House invariably accords from all sides to the man who has just been elected to a position of such responsibility. Immediately this ceremony is dispensed with, however, the House will begin consideration of the Irish Deportee Indemnity Bill, over which a parliamentary contest of the first magnitude is expected to develop.

Not Asked to Join Ministry

The Labor and Liberal parties will oppose the measure at every stage. The Opposition efforts will be directed to insuring firstly that the Government shall not pass a measure opening the way for interference in future with the liberty of the subject; secondly, to secure that any person wrongfully deported shall not be deprived of the remedy at law for damages.

A near sensation has been precipi-tated by a letter of Austen Chamberlain's to his constituents, in which he says he was never asked to join the Ministry, and would have accepted, if he had been. Everyone had believed, and it seems with reason, that Mr. Baldwin intended to include Mr. Chamberlain in the Ministry, but evidently the expectation was unfounded or the Premier changed his decision. Clique Still Functioning

hypothesis and says: "It seems other forces intervened." This theme is elaborated by the Opposition press, which charges that Mr. Baldwin was forced to exclude Mr. Chamberlain on account of the Diehard pressure. The Morning Post, for the Diehards, how-ever, says: "They had nothing to do with it, and that Mr. Baldwin could not include Mr. Chamberlain on account teen volumes include the Mazarin of the personal difference with him Bible, the Latin Vulgate of 1462, sevitorities from a captured Republican last fall over his willingness to submerge the Conservative and Unionist folio of Shakespeare, a first edition parties in a Center Party, under the copy of Fox's Book of Martyrs, a Kil-

domination of Mr. Lloyd George. marno However that may be, Mr. Baldwin cover. but that he refused.

Intimations that Sir Robert Horne if Mr. Chamberlain had been appointed to cabinet office, and the fact that Mr. Chamberlain's letter was issued at an after-dinner meeting with Lord Birkenhead. Winston Churchill, Sir Robert Horne and Sir Laming Worthington-Evans is held in Diehard circles to mean that they have not yet reached the point where they are prepared to act as individual members of the party, but are still functioning as a

ANTWERP POSTMEN RETURN TO WORK

By Special Cable

BRUSSELS, May 28-Antwerp postmen, after striking 14 days, have restarted work unconditionally. The goods trains workers' strike continues, but several of the men have returned to work.

The Railway Minister has dismissed 32 agents for sabotage and about 200 have been suspended for disobedience.

WAR COSTS HEAVY IN LATIN AMERICAS

Six Nations Spend More, Proportionally, Than the United States for Armament

States for Armanent

BUENOS AIRES, Argentina, May 10
(Special Correspondence)—South and
Central America have not escaped the
naval and military rivalry among
themselves which has proved such a
burden to Europe. Figures recently
compiled in connection with the PanAmerican Conference show that six
Latin nations are spending a larger
proportion of their total income for
armaments than is the United States
with 25.4 per cent expended in this
manner. The nations thus emulating
manner. The nations thus emulating sidered strongest or best able to bear

the burden.
Of their total incomes the compilation indicates that Salvador spends 25.7 per cent (1920 budget) for military and naval expenses, Ecuador (1920) 26.12 per cent, Guatemala (1920) 28.7 per cent, Chile (1921) 32.2 per cent, while Mexico spends, accordof total expenditures for war, and in Honduras of the \$4,072,716 spent for ail purposes in 1921, \$1,811,262 or 44.5 per cent went for army and navy work. The largest total military exwork. The largest total military expense in South America (1921) was assumed by Argentina wih \$18,761,777, while of the two other. "A. B. C." powers Bolivia spent \$2,925,498 and Chile \$7,011,143. At the same time Argentina spent some \$15,500,000 on its navy and Chile \$12,557,000. Brazil spent \$15,900,000 for army and \$8,000,000 for navy. Compared with this are Mexico's army and navy expenditures of ico's army and navy expenditures of \$78,250,000.

WHOLE OF GERMANY ENGINEERS SOCIETY TO BE GUARANTEE

Hypothecation of Country's Real Four-Days' Session Opened-Estate Proposed—Security

BERLIN, May 28 (A)-Germany's new reparations program, as it is now outlined, will literally be constructed from "the ground up," for it will rest primarily on a nation-wide real estate

What promises to become the greatest hypothecation of land in the navy. Compared with this are Mexico's army and navy expenditures of \$78,250,000.

Not all this money is going to land and sea forces. European governments are seeing to it that the air of South America shall be filled with flying craft, and the development is taking place largely while the eyes of the United States are elsewhere. By nations the development is as follows:

Brazil has bought from Spain \$250,000 of military airplanes. France has sold to Brazil 32 airplanes, built

flyers, as well as for military pur-cal properties of the industrialists. The plan for the great mortgage is the most important point in the program of the German League of Industrialists as submitted to the Chancelor, Wilhelm Cuno, for the perusal of the Government. indicates its readiness to assume payment of 40 per cent of the hypothetical sum of 500,000,000 gold marks which t believes the Government can raise by assessment on the industrialists' properties. The remaining 60 per cent would be guaranteed by the banking, mmercial, shipping and agrarian in-

terests. Groundwork of Plan

Closely following its recommendation that an hypothecation of real estate on a gold basis constitute the groundwork of the Government's reparations policy, comes the league's plan for reorganizing the federal railways, waterways, posts and tele-graphs. Conversion of these properties into profit-taking institutions, the leaders of big business believe, would suggest to the Government the sibility of realizing from them alone a net annual revenue of 600,000,000 gold marks. Although no direct offer s made by the league for taking over these utilities on an operating basis, the Government has been advised that a group of half a dozen leading industrialists is prepared to guarantee to the Federal Government this amount of gold revenue annually for the operating privilege. Anglo-Saxon Unity—Power

Anglo-Saxon Unity—Power
Test Codes Discussed

Montreal, Que., May 28 (Special)—An important feature of the spring meeting of the American Society of Mechanical Engineers, which opened here today for a four-day session, was an address by Calvin W. Rice of New York, secretary of the organization, who struck an international keynote in declaring that the English-speaking peoples were, as a result of the World War, more and more coming to think and work in concert for the common benefit of all races.

An appeal for unity among Anglosano engineers everywhere was made by Mr. Rice, who told of the movement started in England to attain this end by Sir Robert Hadfield and others. Similar effort has been initiated in France and Italy, according to Mr. Rice, who declared that the spirit of international concord was spreading in the United States. He said this spirit was being fostered by Eugene Schneider and other industrialists in France. Italy was, according to the which the Allies de a restricted in England to attain this end by Sir Robert Hadfield and others. Similar effort has been initiated in France and Italy, according to Mr. Rice, who declared that the spirit of international concord was spreading in the United States. He said this spirit was being fostered by Eugene Schneider and other industrialists in France. Italy was, according to the whole of pre-war concessions, which are being discussed at Angora, but on which the Allies was attained in France. Italy was, according to the world was presentative registered objection on behalf of his Government, but did not wish to do so to the point of imperiling peace. Bulgarian was present the find not wish to do so to the point of imperiling peace. Bulgarian was protection of imperiling peace. An author was not mentioned, as no Bulgarian was prot meretal in this matter was not mentioned, as no Bulgarian was present. An agreement having thus being for imperiling peace bulgarian was prot meretal in this matter was not mentioned, as no Bulgarian was prot meretal not in the

Schneider and other industrialists in being discussed at Angora, but on France. Italy was, according to the speaker, taking a foremost part in the before any treaty can be signed. task, and through the Italian Ambassador to the United States, Prince Gelasio Caetani, was spreading engineering influence and ideals in the field of diplomacy.

Pan-American Understanding

Mr. Rice's address had largely to do with Pan-America. Engineers of he Americas are approaching a better understanding, asserted the speaker, who recently returned from a tour of South American countries, begin-ning at Rio Janeiro, where he attended the engineering congress during the centennial celebration of Brazil, as the envoy of American engineering societies and the Engineering Institute of Canada. His address today was in the nature of a report to the engineers of Canada of the progress and opportunities, through en-gineering channels, of Pan-American cohesion

The South American engineer as a world citizen with a world vision was lauded by Mr. Rice. Herbert C. Hoover's standardization plans, he said, were finding favor in South America where concrete advances toward Pan-American unity were being made as the outcome of the engineering congress at Rio. Charles E. Hughes, the speaker added, had provided for the engineers of the Americas a watchword in proclaiming that science has no frontier."

Test Codes Considered

Another event of today was a public hearing, presided over by Fred R.
Low of New York, on two power test codes, part of a group of 19 which are being framed as aids to industry by 125 leading engineers, scientists and coducators under the auspices of the diplometry. Another event of today was a pubeducators under the auspices of the diplomacy.

Mr. Low, chairman of the main committee of 25 which is directing the code work, said that power just sent a representative to Paris to that code revisions are proceeding. and Great Britain

PEACE IN PROSPECT

Athens Acknowledges Responsibility and Angora Renounces Its Right to an Indemnity

By Special Cable
LAUSANNE, May 28—The tension
which has reigned at the Near Eastern Conference during the past week, as the result of the acute stage of the negotiations between the Turks and Greeks on the question of war in-demnities, reached its culmination on

provisioned until all who are accepted into army be enlisted and that the agreement be signed by foreign guarantors, the local gentry and merguarantors, the local gentry and merguarantors, the local gentry and merguarantors.

The meeting started with an appeal by the British and French representatives, Sir Horace Rumbold and General Pelle, to Ismet Pasha to waive chants. their claims to an indemnity and accept the proposal for a rectification of the frontier around Karagatch in lieu thereof. Both speakers expressed the belief that Ismet and Eleutherics Venizelos had done their best during the past week to reach a peaceful solution and were still environ to do so were lution and were still anxious to do so,

Frontier Bectification

Ismet replied, saying that other treaties had regarded such devasta-tion as that wrought in Asia Minor, as calling for reparation. By degrees, however, a better atmosphere was obtained and eventually an agreement was reached on three points:

1. The inclusion in the Treaty of the acknowledgment by Greece of its responsibility, accompanied by a statement of Turkey's renunciation of its right to indemnity in view of the economic situation.

2. A frontier rectification, giving Turkey a triangular tract in the region of Karagatch, to be defined later by experts.

experts.

3. Mutual restitution of ships captured since the Moudros conference. Concerning the second point the

There remain numerous minor oints to be settled, on some of which an agreement was reached at the meeting of the political committee; but a treaty is now within view. though it seems unlikely to be satisfactory to either side, being a series of compromises from beginning to

France Said to Be Made Victim of Turkish Diplomacy

By Special Cable

PARIS, May 28-France has sacrificed so much for peace in the Near East since the Franklin-Bouillon policy was begun that although there is delight at the settlement between Mr. Venizelos and Ismet Pasha at Lausanne and the prospect of war is disappearing, it is anxiously asked who will pay the cost of the transac-tion. Will it be, as usual, France? Will the country which has shown itself ready to placate the Turks at

any price again suffer? There is a growing section of politicians who think that the French surrenders have been too numerous. The present situation is that Angora will receive no pecuniary indemnity for the devastations in Anatolia attributed to the Greek Army in re-treat. But Angora will receive territorial compensation, namely the sub-urb and railway station at Adrianople,

Ismet says that in renouncing the settle accounts with Turkey. If Greece has not the money, neither has Turkey, and Turkey after this concession to Greece expects a similar con-cession from the Allies in order to make easier the payment of coupons

made promises in this respect. Is it really true, ask Frenchmen who are test code revisions are proceeding ask that the coupons of the Ottoman simultaneously in the United States debt, instead of being paid in gold, and Great Britain.

But it would appear that Ismet, it return for the so-called generoaity in the foregoing Greek payments, looks to the French to agree to some such measure. Apart from this French anxiety over the settlement, the Serbian delegate has called attention to the danger for the Balkan states of the Turks taking possession of the bridgehead to the west of the Moritza.

The matter is also complicated by the promise to Bulgaria of access to the Ægean Sea. The promise is not yet kept, but to reach the port of Dedeagatch the Bulgarians must necessarily use the railroad which passes through Karagatch. The Turks, holding this station, have in their hands the key to the engagement of the Allies to Bulgaria. The inquietude thus expressed has certain justification and although peace is expected definitely to be made during the week at Lausanne it would be advisable to consider whether it is a good or a

United States to Negotiate Treaty of Amity With Turks

Special from Monitor Bureau WASHINGTON, May 28—An exchange of views is now taking place between the United States and Turkey preliminary to the negotiation of a treaty of amity and commerce be-tween the two countries. The proposal was made by Ismet Pasha on

behalf of the Turks. It is not expected that the treaty can be completed before the termination of the Lausanne Conference, but it will be expedited as much as possible because American interests will not be disposed to make investments in Turkey until commercial relations are safeguarded under a new treaty. There are the fewer obstacles in the way of coming to an agreement on the terms of the treaty because the United States never was at war with Turkey and relations with the old government were not severed and the action of the Turks in giving way on the collection of reparations from Greece also will be counted in thei favor since this was done partly in response to the appeal of the Amer ican representative at Lausanne, Jo

eph C. Grew. The United States is about to make other commercial treaties with foreign governments, these being necessitated by the expiration of old treaties, bu it also gives an opportunity to estab-lish a new basis, taking into account the changed conditions since the war

by recent hearings before congress sional committees, point conclusively to the fact that wages are an integral part of the problem as they see it. Representatives of American indus-try who appeared before the committees of Congress last winter indulged in some rather wild speculations con-cerning the number of wage earners who could receive employment at the present time if they were available. Rough tabulations of their claims make the total somewhere between 2,000,000 and 3,000,000. In their guesses these representatives put the labor shortage around 10 per cent. A more scientific compilation just completed by the National Industrial Conference Board indicates that the hapazard estimates of the witnesses were far too high.

15, they had unfilled places for 28,389 wage employees, indicating a shortage of 3.2 per cent. The data cover every field of industry of any moment, and the reports revealed a great variation between different industrial groups. If it had not been for three industries, lumber, fertilizer and granite quarrywhich the labor shortage was reported to be more than 10 per cent. considerably below 3 per cent.

Conference Board Table In view of the use that is being Conference Board is of interest:

Unskilled Labor Lacking

The reports from these 2263 industrial plants indicate that the greatest demand is for unskilled labor. The shortage in that group of labor amounts to 5.4 per cent. The shortage of skilled labor is only 2.5 per cent of skilled labor is only 2.5 per cent and the shortage of women wage earners is 3 per cent. The amount of labor shortage varied greatly between different states, some states showing little or no labor shortage, while other states showed a comparatively high percentage. I have already invited attention to the difficulties of distributing immigrant culties of distributing immigrant labor among industries, both because there are no adequate facilities, and 8:15.

Tremont—"The Rise of Rosie O'Reilly," 8. immigrants and the fact that they wilbur—"Liza," 8:15. naturally settle where they have rela-

tives or friends. There is another problem of immigration of a politico-social nature which nevertheless is a source of con-siderable anxiety for the industrialists H. B. Lowry, chief officer of the Leviathan, Hotel Bellevue, 12:30.

Perkins, will be given on be followed by a reception at the suddence, without the concomitant of refreshments. The performance, under Mr. Jacchia's baton, was spirited. Evidently the Sunday "Pop" concerts have come to stay. The next one is announced for June 10, with an "Operation prope almost entirely by emigrants from government or that the Socialist Party in America was founded by German emigrés.

The method proposed by the Chamber of Commerce of the United States for bringing about this change in the racial predominance of immigrants is embodied in the bill introduced by David A. Reed (R.), Senator from Pennsylvania. He would increase the annual quotas to 5 per cent and base them on the 1890 census instead of the 1910 figures as under the present law. That would enlarge the total quota of immigrants from 357,803 to 403,143, but it would have a very marked ef-fect upon racial, or rather national, percentages, as will be seen from the following examples.

Mr. Reed's Estimate

Austria's present allotment of 7451 would be reduced to 2757; the quota of Czechoslovakia would be reduced from 14,357 to 5076; Italy's present quota of 42,057 would be cut down to 9779; Poland's 21,076 would be reduced to 12,888, and the quota of Russia, including the former states of Esthonia, Latvia and Lithuania, would be reduced from 26,811 to a mere 6175. On the other hand, the number of Germans who could be admitted would rise from 67,607 to 128,067 and the Entered at second-class rates at the Post Office at Buston, Mass, U. S. A. Acceptance for mailing at a quota from Great Britain would rise special rate of postage provided for in section 1103, act of Oct. 3, 1917, authorized on July 11, 1918. quota from Great Britain would rise quota would increase about 4000, that

p. m. will conclude the day's activities.
Edward A. Beard, president of Wisconsin University, will address the annual meeting of the Society of Alumni and the Loyalty Fund Association on the subject, "The Relationship Between Cultural and Vocational Educations," on Saturday at 10 a. m. in Stetson Hall. Following the Varsity Club luncheon at 12:30 p. m. in the Commons Club, there will be a baseball game with the New York Athletic Club at 3 p. m. on Weston Athletic Club at 3 p. m. on Weston of Denmark would increase 1300 and from Norway and Sweden about 4000 each. Plan May Not Work

The difficulty that has been found with this system of selection is that with this system of selection is that it does not correspond with the historical facts of immigration during the last quarter of a century. If, as the industrialists claim, more immigrants than the present quota are needed every year in order to maintain the ranks of labor at a satisfactory level, the proposed Reed law bids fair to cause them disappointment. The number from South Europe and the Near East would be cut down materially, but would the peoples of the other countries take advantage of the more liberal allowance?

We have seen that even now, when their own country is in a most distress-ful state economically, the number By actual report from 2263 firms, employing 874,182 wage earners, the Conference Board found that on March their quota, and that in spite of the fact that the emigration from the fact that the fact that the emigration from the fact that the emigration from the fact that German seaports shows a steady in-crease and is almost equal to pre-war figures. But the German emigrants are turning toward South and Central who have registered at Jesup Hall. America rather than toward the

United States and Canada. The British Government for more than two decades actively pursued the policy of encouraging the emigration of its European subjects to other the general average would have fallen countries within the British Empire. which in itself tends to discourage emigration to the United States. Until April of this year the British quota made of the labor shortage in America filled, and it was only a final rush to force a change in the percentage of immigration from the British Isles, restriction immigration law, the following tabulation of the study of the ment on account of acute economic conditions, that has practically filled that quota within the last few weeks.

British Labor's View But British Labor, even when it is But British Labor, even when it is harassed by much unemployment as has prevailed during the last four as they apply to China, be made effectations. years, is opposed to emigration as a tive, is the view that is being accepted means of relieving the domestic situa- here by Government officials. Presition. A recent article in the Labor Service refers to the view of British Labor that emigration as a cure for unemployment, and even as a means of relieving the country of its "surplus" population, is a delusion and

a snare. Moreover, for a long time the Scandinavian countries have made every possible effort to discourage emigra-tion to America. The rush of Swedes and Norwegians to the United States in the days when there was still plenty of land to be taken up in the northwest prairies, produced a real eco-nomic problem in Sweden and Norway and caused those governments to take steps to keep their people at home So even as late as April the total quota of about 37,000 from Norway, Sweden, and Denmark lacked about 14,000 of being filled. In the last few weeks the edish Government has been forced by unemployment and other economi causes to let down the bars to emigration, which brought quite a rush from that country, but such movements are

WILLIAMS TO OPEN PROGRAM JUNE 20

Commencement Observances to Begin With Baseball Game

WILLIAMSTOWN, Mass., May 28 (Special)-Williams College is ready for its one hundred and twenty-ninth annual commencement which will begin on Wednesday, June 20 and continue until the following Monday when the commencement exercises will be held in Chapin Hall. The program enue for amortization will open with the baseball game with the University of Vermont to be The proposed increase in the customs revenue to 7½ per cent, will yield almost \$15,000,000 additional a followed in the evening by the senior

On Friday morning there will be meetings of the Association of Class Secretaries, the Alumni Advisory Council, the Board of Trustees, the directors of the Loyalty Fund Association, and the Phi Beta Kappa Society. The class day exercises will gin that afternoon in Chapin Hall to be given by James C. Ward, and the class poem, by Kenneth P. Britton. Immediately afterward, ceremonies will be continued at the Thompson Me-Immigrant Paradoxes

It makes no difference that there is no foundation of fact for many of the retainments about immigrant aligns.

Morial Chapel with the ivy poem by Francis B. Shepherdson, and the ivy cration by Grenville S. Sewall. On the Lawrence Hall campus, there will hall was crowded, and again the almost entirely by emigrants from place at 8 p. m., on the Chapin vakian children, Frantisek Bakule, the British Isles, have a Socialist Hall portico, and will be followed by director, will contribute songs to the a program of music by the musical "Pops" program.

In the memorandum handed to Herr Cuno, the Industrialists estimate that 1.100,000,000 gold marks annually for the next few years could be derived from the initial mortgage on the land and from the administration of the railways and other utilities by the business interests. The memorandum impresses on the Government the impresses of the Government the impresses of the Government of the Gov baseball game with the New York
Athletic Club at 3 p. m. on Weston
Field, and a meeting of the Alumni
Athletic Association at 5:30 p. m. in
Jesup Hall. Class reunions will take
place during the evening as follows:
'73, '74, '75, '76; '92, '93, '94, '95; '11,
'12, '13.

At the conclusion of the exercises, the various divisions of the procession will pass out under the leadpossessed of movable assets." It is added that the revenue thus derived would eventually enable the Government to realize and establish definitely an annual provision in the budget for a reparations revenue of 1,500,000,000 gold marks.

With these annuities assured and guaranteed, either Germany or the creditor nations could invade the world money market on a sound bor-rowing basis. German calculators suggest that 30 annual installments of 1,500,000,000 gold marks each would represent security for a loan of 30,000,000,000,000, whereas 50 annuities would equal the capital, interest and amortization on 40,000,000,000 to 45,-

The League's memorandum frankly of obtaining hostages. There were no stresses the need for "an intensifica-tion of Labor" in behalf of Germany's reparations bill, and suggests that although the eight-hour day will continue "in principle," workers in all Questionable Debts Demanded lines must strive for an increase in both the quality and quantity of their production. The Government is also loan to China can the results of the politely requested to abandon com mercial enterprises which are in com-petition with legitimate private under-

Freedom of German Action

The Industrialists make their as sumption of guarantees conditional upon the grant of complete political and economic freedom of action to Germany. They also ask that its sovereignty and its customs duties remain inviolable, and that the forthcoming reparations adjustment be made permanent and final.

The present memorandum is intended only as a preliminary sketch of the League's program so far as it concerns its support of the Government's reparations policies, and admits that many technical details must still be formulated precisely. Its primary purpose is to apprise the Cuno Government of the industrialists' views on reparations and to indicate the extent of the Deague's co-opera ence, as previously agreed in Peking, tion in the assumption of guarantees Herr Cuno discussed the documen with Reichstag leaders over the weekconfronting the governments as to whether China can keep afloat that end. There is no inclination on the part of either Chancellor or the

Foreign Minister, Baron von Rosen-berg, to be unduly hasty in compiling the Government's new reparations note, as numerous details must still have not actually added to its strength. Some of them are still only potential and some actually added to its burdens, as for example the restoration of Shantung, an act of justice, but a responsibility at a time when the central government was One of these is the attitude of the Socialists and the Labor Federation toward the program of the League The federated states must also be conwhen the central government was sulted, inasmuch as their consent is hard put to it to discharge those needed before assessments are made

Imperative Need of Economy
In the memorandum handed to Herruno, the Industrialists estimate that

off by their friends.

The terroristic methods at Dortmund were preceded by bitter fighting between the Communists and blue police at a near-by mine where Communist emissaries tried to induce the pumpmen to leave so that the mine would be flooded. Several automobile loads of police came up and attacked the Communist forces and drove them away after fighting in which the police had two men killed and il wounded, one of the latter fatally. The Communists left two killed on the field and carried many wounded away with them. They were armed with hand grenades, which they used effectively, the police reported.

The strike is spreading into the

the police reported.

The strike is spreading into the Rhineland. At Duisburg the metal workers went out today. The situation at Hamborn is so serious that the authorities have prohibited the sale of alcoholic drinks, and other industrial centers are considering the adoption of the dry rule. At Düsseldorf the security police had a clash today with striking street car and gas works employees, in which one workman was killed and a number were wounded.

Sixteen motor trucks were required

Sixteen motor trucks were required to carry away the 92,000,000,000 paper marks and 17,000 pieces of German silver money seized by the French from the local branch of the Reichsbank yesterday. Guarded by armored cars, the money, which is the equivalent of about \$2,000,000, was taken to Düsseldorf and sent by train to Mayence. The French will apply the seized funds to French will apply the seized funds to the costs of the army of occupation.

French Issue Fresh Order BERLIN, May 28 (AP)-General Degoutte, French commander in the Ruhr, has issued a new order to the German railway men to resume work under the French within 48 hours. All railway men under 60 years of age who fail to do so will be expelled from the occupied territory, while those more than 60 may consider themselves dismissed from the service

NEAR BOLSHEVISM

L. H. Murlin Says Europe Must Reconstruct Self-America Can Give Little Aid

tion for individuals, must come from nual convention of the National Arcostock Valley railroad capitalist, within," says Lemuel H. Murlin, president of Boston University, now traveling in Europe, in a letter com-

We had a very interesting trip to Berlin via Belgium and Holland, returning through the occupied region on the Rhine. I cannot but feel that the money-grabbers and the monarchists are doing much to drive Germany into Bolshevism. The only friendly hand held out to Germany now is the hand of Russia; and it is a hand she does not want. The least gesture and Republican Germany will fall and become Bolshevist Germany. On the other hand, the least helpful gesture from hand, the least helpful gesture from hand, the least helpful gesture from the Allies would strengthen the German Republic and perhaps enable it to hold out. The world will always have to deal with Germany; it will be a Republican Germany or a Bolshevist Germany. For my part I cannot but feel deeply that it will be far better for civilization and world peace to have a Republican Germany rather than a Bolshevist Germany.

Bolshevist Germany.

I think our most interesting experiover in Germany from Frankfurt, just over in Germany from the occupied region, to Weisbaden, the first station in the occupied territory, by auto—no rail trains are running. The ride requires an hour and a half by autobus quires an hour and a half by autobus and costs 50 cents aplece! Being Americans our baggage and persons went through easily, but the Germans had a harder time and were uneasy! Weisbaden was one of the favorite resorts of the Kaiser. We stayed here overnight—under guard by the French!

The next day we rode down the Rhine to Cologne, an all-day ride, for about 75 cents apiece. And it was an ulet, though we were less than a half from the scenes of rioting at

Mulheim. But one never knows what will happen in war; we felt all the I presume you will be expecting me

something about the international situation and what the United States must do "to save Europe."
There are thousands of Americans in
Europe now, and other thousands are
coming, and nearly all of them boldly announce they are here "to study" something or other "at first hand." And hefore they have been here 48 hours they begin to announce the results of their "research.". One United States Senator, in Europe for the first time, landed in Moscow on the 28th; on the 29th he announced that Sovietism was a great system and he believed that the United States should recognize Soviet Russia!

Soviet Russia!

The United States can do very little
"to save Europe." Salvation for nations and continents, like salvation for tions and continents, like salvation for individuals, must come from within, by working with eternal laws of being—economic, social, political, educational, religious. Outside help may come in to help the individual to do for himself what he alone can do. I think Mr. Harding has expressed the very minimum of what we should do—and perhams at that we can do now. hans all that we can do now.

EXPLORER TO STUDY

B. MacMillan, who will sail from here June 16 on the little schooner Bowdoin to resume his Arctic explorations, announced yesterday that one purpose of the expedition is to determine whether there is beginning another ice age, as the advance of glaciers in the last 70 years would indicate. Other purposes are study of terrestrial magnetism and atmospheric electricity, botany, ornithology, and the obtaining of a series of photographs of bird and animal life. Thirty thousand feet of motion picture film also will be in the Bowdoin's outfit.

Long copper strips are being at-tached to the hull of the vessel to be used for a ground connection for the radio receiving and transmitting station which is being installed. Next winter radio fans will attempt to "copy" WNP-Wireless North Poleand get the latest Polar news. The American Radio Relay League, comnosed of thousands of amateurs, which has made possible most of the longdistance transmission records, is co operating with the expedition, and every evening its many members all over North America will be on the alert for signals.

VOTERS REGISTERED IN CITY HALL ANNEX

Registration of voters began today in the office of the Board of Election Commissioners, Boston, City Hall Annex, and will continue every Monday throughout May and June. Beginning July 2, the election board's offices will be open from 9 till 5 every weekday, except Saturday, for registration. Saturdays the office closes at noon. In November registration offices will be opened in each ward. For the last election 246.133 women registered, but only 87,219 voted.

If I had two loaves of bread, I would sell one of them to buy

GERMANY DECLARED FLOATS IN PARADE NORTHERN MAINE

Eastern Star Chapters Propose Many Features

From 35 to 40 floats from various chapters of the Order of the Eastern Star of Massachusetts will form an "The United States can do very impressive feature of the great parade little 'to save Europe.' Salvation for on Wednesday, June 13, in connection nations and continents, like salva- with the holding of the eighteenth an-League of Masonic Clubs. These floats will cost from \$150 to \$300 each.

Indeed, Eastern Star participation menting on the situation in Germany in the various events of that week will and the Ruhr. The letter reads in be an outstanding feature of this convention of the National League of Masonic Clubs.

Bay State Chapter, which has its quarters at No. 585 Boylston Street, in Copley Square, is preparing to keep open house all the week to members of the Order of the Eastern Star. Mrs. Lulu M. Gobrecht of the Hemenway Hotel is the Worthy Matron of East ern Star Chapter, which is the only

one in Boston proper.

An unusual feature in connection with the part Bay State Chapter is to take in the festivities of Masonic Club convention week will be the exemplification of the degree of the fraternity and the Emblematic Star on Friday evening, June 15, the night of the final banquet of the delegates to the convention at the Copley-Plaza Hotel. Mrs. Gobrecht said that Clesson S. Curtice, Grand Patron of the Grand Chapter of the Eastern Star in Massachusetts, will give the obligation in connection with the initiation of about eight candidates for the degree in Bay State Chapter that night.

The exemplification of the Emblematic Star is something rarely seen in chapters of the Eastern Star and it cannot but prove an added attraction to the ceremonial of the evening. Mrs. Jane Grav Payzant, Grand Ma tron, will be present. Mrs. Emily Eldredge and Mrs. Effic King, past about 75 cents apiece. And it was an exceedingly interesting day. The English are keeping "The Watch on the Rhine" at Cologne, and everything was cuitet though we want less them a better the conductress. The Rhine is the conductress and other Grand conductress. Grand Conductress, and other Grand Chapter officers, will be invited.

Because of the fact that Bay State Chapter members and officers will be while we were walking on the edge of a volcano. Feeling runs very high and a very slight thing may reduce violent coutbreaks any day. I am surprised things have remained as quiet as they not be represented in the parade by a float. This chapter on Jan. 1, last, had 135 members, today it has 182 active members, with not less than eight candidates for the degree. The chapter was formed three years ago, and celebrated its third annual festival on May 17. Inspection is arranged for September and Matrons' and Patrons' Day in October with a bazaar following next November.

William L. Terhune, president of the Boston Masonic Club, addressed Woonsocket Masonic Club late last reek speaking to several hundreds of Masons as the Warwick Club of nearly 300 strong visited Woonsocket (R. I.) Club on that occasion. Woonsocket Club, which now has over 300 me bers, expects to have from 500 to 600 members by convention week, according to President Terhune.

MEMORIAL SPEAKERS

the world to a lasting peace was the complications." keynote of the ceremonies held yes-ADVANCE OF GLACIERS terday at Concord, Mass., on the occa-WISCASSET, Me., May 28—Donald MacMillan, who will sail from here MacMillan, who will sail from here with the manual pilgrimage of members of the British Naval and Military Veterans' Association to the Bailey, formerly of Boston, now director battlefield of 1775 where they decorated tablets erected to two unidentified British soldiers and monuments dedicated to the memory of Ameri-

cans in past wars.

Peace for the universe, as a fitting tribute to the sacrifice of the last conflict, was the dominant message of an address delivered by the Rev. Robert Wilson at the annual memorial services held yesterday at Fenway Park. Other similar observances held throughout Massachusetts were marked by emphasis on the part the world to build against further

OF MASONIC CLUBS MAY GET RAILROAD

Aroostook Project Said to Have Reached Point Where Success Is Assured

ment Railway have reached a point which makes the proposed Quebec Extension electric line across the northern part of Maine seem a practical certainty, although no formal announcements may be made for some time. The indications are that only a radical change in the present attitude of the Canadians will upset a plan to connect the two roads by a between Washburn, Me., and La

Fontaine, Que. In the project proposed by Mr. Gould, he and his associates are to build a railroad from Washburn to a point on the Quebec border above Ludwig Pond, while the Canadian road will construct a branch from La Fontaine to this point. The American line will be 100 miles in length and the Canadian about 20.

The developments promised by the consummation of this project surpass any other attempted in the latter-day history of Maine. The road will tap 5000 square miles of territory. Former Forest Commissioner Ring estimated that it would take a yearly cut of from 75,000,000 to 100,000,000 feet of spruce to go over the ground in the Allegash Valley alone, and take off the lumber now standing. After that he estimated that this valley would yield from 50,000,000 to 75,000,000 annually. Two million acres of virgin forest land lie along the proposed right of way. The total spruce stumpage estimate today is 2,000,000,000 Innumerable opportunities lie all along the line for shingle mills, and other manufactures of lumber. The paper companies, now controlling bout 600,000 acres in the affected territory, would, it is estimated, move about 200,000 cords of pulp wood annually over the new line.

The proposed line would furnish the shortest possible route between Chicago, Minneapolis, and the west to the same point cover 1900 miles at present, while the new line would refrom Montreal to Presque Isle on the Canadian Pacific railroad now rides 539 miles, whereas the new routing

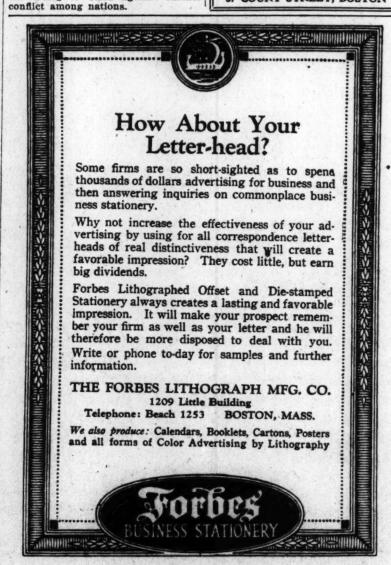

The approximate cost of the road's

The approximate cost of the road's construction was once estimated at \$3,300,000, but may reach \$4,000,000 at present-day figures.

"I do not see why the Interstate Commerce Commission would have any reasonable objection to this plan," says Mr. Gould. "It is not by any means a parallel line. Our state charter is granted." charter is granted. We are financed soundly, and the Canadian Government does not have to put a nickel MAKE PEACE PLEAS into any part of the road save that which it will build on its own side of Anglo-American unity in leading the border. There are no interstate

Wail of Steam Calliope Signals Boston That the Circus Is Here

Sells-Floto Combination's Big "Six-Pole" Show Opens on Huntington Avenue Grounds

Sells-Floto circus has come to Boston, unfolded its tents almost as silently as the Arabs folded them, covcus grounds with life and color and est animals and riders to parade Boston streets. Twice a day all through the week, at 2:15 and 8:15, with pos-sibly three performances Memorial Day, the clowns will disport, the Arabian steeds prance the elephonte. Arabian steeds prance, the elephants do feats for the boys and girls of Bos-ton—whether aged 7 or 70.

One look at the Huntington grounds convinces anyone that it's the circus. Most spectators will go down the mid-way, see the side shows, linger in the menagerie (under canvas), and after sampling popcorn and pink lemonade and perhaps indulging a favorite elephant with peanuts, will enter the Big Top with never a thought of what lies behind. Sells-Floto is one of the two "six-pole" big top shows in the counry. Spectators will see, besides the Wild West Show, the new spectacle, 'A Night in Persia," the performances of riding acts and of the two Belgian Hodgini groups, the clowns and the special act of Miss Erma Ward. With these, no doubt, they should go home quite satisfied. But out in back of the main tent-where the audience will not go-is another "show" as interesting as the first.

Here are the dressing tents where the clowns and riders make up, each with a seat to himself, one half-sized trunk apiece, a bucket of water, a small metal coat hanger and not much else. "Stars" have trunks of normal size. Everything has to be brought in on one of the 56 steel rail coaches and must be compact. That is why the circus is able to spread out over such an area, and can be folded up and put away so quickly. The special refrigeranimal cages, the electrical plant, with northern New Brunswick. The pres- all the other special tents and trucks, ent routing to Presque Isle from can be spread out, the big top put up Chicago is 1476 miles via the Lake and a performance staged four hours Shore, New York Central, Poston & after arrival of the first car. PRESQUE ISLE. Me., May 26 (Special)—Negotiations between Arthur R. Gould. former state Senator and Arostook Valley railroad capitalist, and officials of the Canadian Government Reilway have reached a point.

The blare of a band, the clatter of a calliope, all the mess signal needed. In the entrance is silent reminder that those under canvas are always on the move, for letters from home are posted where all can see, and some letters under canvas are always on the move, for letters from home are posted where all can see, and some letters have followed the show in its jumps from city to city, just missing delivery each time, half across the continent.

STATE ORDERS 110,000 TONS OF BITUMINOUS COAL THROUGH AGENT

Acting for the first time through its central purchasing agent of the new Department of Administration and Finance in buying fuel, the Common wealth of Massachusetts has placed a contract for 110,000 gross tons of bituminous coal to supply the various state institutions and schools. This is the largest coal contract ever made by the State, and has been awarded to the National Coal Sales Company of Boston, the lowest of 22 concerns

bidding. company getting the contract bid \$2.91 per ton at the mines for coal delivered up to Oct. 1; \$3.14 per ton between Oct. 1 and Jan. 1: and \$3.70 on coal ordered between Jan. 1 and April 1 of next year. The department states that the average freight rate to state institutions located along the railroad lines is \$4.50. These institutions will use about 100,000 tons and the remainder will be delivered at a total price of not more than \$9.76

WELLESLEY SELECTS SUMMER CLASS GIRL

WELLESLEY, Mass., May 28 (Special)-Miss Carroll McCarty has been chosen to represent Wellesley College in the college girls' summer class which studies social conditions in New York City under the direction of the Charity Organization Society of New York. Miss McCarty, who will serve next year as president of the Wellesley College government, is a Durant scholar and has also been president of her class.

The New York class will be composed of college juniors, members from Goucher, Elmira, Vassar, Rad-cliffe, Barnard, Mount Holyoke, Smith, Out in back of the circus, in a large tent the public never sees, some 1100 lege girls who intend to go into social employees eat "mess" at red gingham-covered tables in turns. DRY DOCK CLAIM **GOES TO BOARD**

Special Commission May Authorize Payment of Sum Not to Exceed \$200,000

In the closing hours of the session of the Massachusetts Legislature and seven-hour day, which, according to a despite a unanimously adverse report statement by George H. Dresser, gen- of the House Committee on Ways and eral manager of the New England Means, a measure was rushed through Telephone & Telegraph Company, the Legislature and signed by the cannot be granted by the company.

At a meeting of the New England \$200,000 to Holbrook, Cabot and RolCouncil of the Telephone Operators' fins in connection with the building of
Union, held yesterday in the Tremont the South Boston dry dock during the

Union, held yesterday in the Tremont Building, on recommendation of the wage committee, it was voted to reject the communication from the company executives, and to submit three questions to the members of the union for consideration.

The questions are:

1. Shall the action of the council in rejecting the company's communication be sustained?

2. Shall a strike vote be polled for the enforcement of wage increases and the seven-hour day?

he enforcement of wage increases and he seven-hour day?

3. If the majority of the locals favor such a vote, shall the committee be authorized to set a date for the polling of such a vote throughout the New England territory?

These questions, in the form of a ballot, will be sent to each one of the ballot, will be sent to each one of the ballot, will be sent to each one of the ballot affiliated with the council, the company. The State filed a counter claim for failure to complete the dock within the contract time and the corporation's claims were turned down in the Superior Court. Appeal was taken to the Supreme Court where it now is at the same time that legislation is passed in connection with it.

The Ways and Means Committee of the House reported on March 15 that no legislation was necessary in the matter of the payment. Last Thursday, however, the day before the Legislature prorogued, the bill appeared from the Senate Ways and Means Committee and weath through both Committee and went through both branches under suspension of the

The NEWEST STATLER Is in **BUFFALO**

On Niagara Square, Where Delaware Avenue begins

It's Open and Ready For You

The newest Statler is luxurious and beautiful, embodying the results of all the Statler experience in hotel-building. Every room has private bath, (97% have both tub and shower), circulating ice-water, and the Statler service-door, (which enables employees to call for and deliver clothes to be pressed, shoes to be polished, etc., without seeing you). There are three excellent restaurants besides a cafeteria and a lunch counter; a complete Turkish bath with swimming pool; a library; a 24-chair barber shop; a ball room and convention hall; many private dining rooms of various sizes; two pipe-organs; a floor of sample rooms; ample facilities for handling large or small conventions with a minimum of inconvenience to other guests; a 600-car garage with a clever system of double ramps.

Rates are from \$3.50 per day for one person, \$5.50 for two; twin-bed rooms (for two) from \$7; there are 104 parlor suites at various prices. In all Statler-operated hotels, rooms are priced in plain figures and are the same price to everybody and at all seasons.

Statler Service is Guaranteed

We guarantee that our employees will handle all transactions with our guests (and with each other) in the spirit of the golden rule—of treating the guest as the employee would like to be treated if their positions were reversed. We guarantee that every employee will go to the limit of his authority to satisfy the guest whom he is serving; and that if he cannot satisfy him he will immediately take him to his superior.

Sing and Chatter Way Into Favor of Governor Cox, Who Tells Stories and Says "Na Zdar" on Their Leaving

Resplendent in the red and white trappings of their native garb, 35 children from Czechoslovakia, grateful for help already rendered by America, recently serenaded Gov. Channing Cox of Massachusetts. They are blazing a trail of newly won friends as they tour this country. Wherever they have been, their voices have thrilled can even read music."

Resplendent in the red and white sulted but for the deep love they so evidently feel toward Frantisek Bakule, who led them. Asked how he accomplished such results, their teacher replied:

"They sing as they were made. In other words, these children sing with God-given voices. Very few of them can even read music." trail of newly won friends as they tour this country. Wherever they have been, their voices have thrilled all who listened, for they are the chorus from the Bakule School at Prague, and are traveling through the States as representatives of the Junior Red Cross of their home-

America has strongly attracted this youthful band of troubadours, and they are rapidly assimilating Ameri-can traits and ideals. Though a number of their songs are in English, and though they sing these with scarcely an audible fault, until recently they did not understand a single word of the language. Now, however, they can say, "ice cream" quite fluently, and know what it means, too! And simple greetings and farewells are being added to their English vocabu-

mingled freely with American chil-dren, and each nationality has shown a kindly interest in the other, though conversation has, at times, rather ever, the entertainment which members of the Bohemian-Slavonic Club bers of the Bohemian-Slavonic Club adopted the custom of selling them, of Boston tendered them, for Czechs and giving half the proceeds to the came from as far as New Bedford and Springfield for the occasion, and them in their native tongue.

One of the most pleasant occasions of their visit to the United States occurred a few days ago, when Governor Cox greeted them at the State ful happy citizen of his country. One

Later they sang the Tzech national hymn, "Where Is My Home?" and the Slovak anthem, "Lightning Flashes Above Tatra."

Next came a love song, "Water Is Flowing Near My Window," sung by a young girl against a background of humming. This song is said to be the favorite of. President Masaryk of the children's native land.

Governor Makes Friends The Governor completely won the singers' hearts, and as he shook each tiny hand he said, with a broad, guber words for goodby—'Na zdar!"

Mr. Bakule believes that education

imple greetings and farewells are leing added to their English vocabulary daily.

Favorites with School Children

When visiting schools they have lingled freely with American children are leingled freely with American children.

Mr. Bakule Delieves that education should be a process of natural development, and in his school at Prague this is never forgotten. The children enter at the age of six years, and begin at once, under the supervision of their teachers, to play and listen to stories. Such stories as those found in Kipling's "Jungle Books" touch their imaginations and develop their vision. In Prague, the children have made toys so successfully and in such quantity that the school has most worthy children, while the other half helps to maintain the school

which is training them.

What may appear to many to be physical handicaps are simply problems to be overcome at this school, House at Boston. They sang many songs for him, including "The Star Spangled Banner." The children sang with a beauty and fervor seldom heard, which could not have re-

Dry Goods-Fancy Goods "The Ladies' Shop"

A very encouraging feature of the statistics of European air traffic for the last few months is the decreased seasonal variation of the business. Both passenger and express traffic, particularly the latter, have held up well during the past winter, and during January the air port of Paris, LeBourget, averaged six commercial week-day, while the passengers numbered about 25 a day and the daily express business ran to over a ton. Such loss of passengers as does appear in the winter months is due almost entirely to the decreased number of merican tourists, for in Americans make up over half the total number and in winter the English furnish over half the business and the Americans only a fifth. There is almost sure to be a certain

ates not at all.

SHOE WORKERS BEGINETO RETURN

Brockton Manufacturers Report Improvement in Situation. Several Shops Reopening

BROCKTON, Mass., May 25 (Special)—Brockton shoe manufacturers reported improvement in the strike situation today several reopening their factories and stating that practically all departments were running. Every factory was picketed this morning, and although hundreds of workers entered the buildings there were no disturbances of any kind.

A new feature of the strike situations came Sunday afternoon, when the Lasters' Federation of Southeastern Massachusetts, comprising the lasters from Brokton and all towns in the south shore district, went on record as opposed to the strike. The federation made the following statement:

record as opposed to the strike. The federation made the following statement:

We go on record as being absolutely opposed to the secsation of the so-called independent movement and we pledge ourselves to uphold the policy and contracts of the Boot and Shos Workers' Union. We urge all members to return to work at once, as there is no legal strike in Brockton. While we realize the present unfortunate affair is but a culmination of many grievances, we feel assured that there is within the organizations the means to adjust them if properly employed, and can see no reason for destroying the work of 20 years without a definite plan or understanding of how any improvement is to be secured by making a scrap of paper of our pledged word.

Officers of the Boot and Shoe Workers' Union report that members on strike are continuing to buy stamps in order to retain their membership, John F. Reilly, chairman of the big independent mass meeting last week, purchased enough stamps to maintain his membership in the stitchers' union.

Austria Adopts Policy of Compromise and Acquiescence, While Hungary Furiously Kicks Against the Pricks

the countries of the Little Entente have for some time been made a special study by Dr. Max Kulka, who here presents his conclusions in two articles, the second of which will follow shortly.

VIENNA, May 10 (Special Correspondence)-Hungary was treated very severely in the peace treaty of Trianon and is but a shadow of its former self; it has lost two-thirds of its territory and more than half of ts population. The country, bled white by a war of unparalleled violence and an ensuing peace of unpar-alleled stupidity, was afterward the victim of invasion by Rumania, which is estimated to have caused damage of considerably more than \$1,000,000,000. Two revolutions followed, with enormous losses in property and life. Nor was this all—the return of former King Charles nearly caused a new civil war and split the country into

two armed camps. Hungary Objects to Peace Treaties

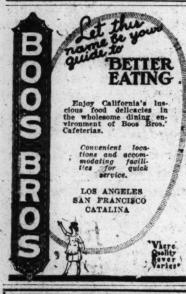

Horthy had established his régime by means of the officers of the old Austro-Hungarian Army. Militarism was established quite as bad as the old Prussian militarism ever was, and the Government ruled by force, executions, murder and internment. Austria

Conditions in Austria, Hungary, and | definitely cut its losses and adopted a method of compromise, while its army was completely demobilized. Hungary stirred up its nationals everywhere to active resistance.

The neighboring states, particularly Rumania, treated their Magyar minorities in flagrant violation of the peace treaties. Things are not very much better in Czechoslovakia and Jugo-slavia, but the fact remains that Hungary herself evinced not the slightest pacificism. There are, however, still in the country a great number of ir-regular formations, which can be conveniently disavowed, but which are in reality very closely connected with high personages and receive encouragement in many ways. Czechoslo-vakia, Rumania, and Jugoslavia have acquired in the peace treatles some of the wealthiest parts of former Hungary. These three countries formed,

immediately after the conclusion of peace, the Little Entente. Its spearhead is directed against Hungary, and a very close military understanding exists between the partners in case of trouble with Hungary. It aims at establishing a Slav preponderance in Middle Europe.

joined by Sir Peter Rylands, who, as a past president of the Federation of British Industries and a leader of the National Alliance of Employers and Employed, comes within a different category. Sir Peter finds fault with the Councils because, he holds, their interests have become narrowed down to mere consideration of wages and conditions of work.

Alm of the Movement

The aim of the cotton industry, movement goes far beyond anything yet attempted by a Whitley Council. The Lancashire cotton trade, and especially the spinning section, is passing through a very critical time, owing to the fact that the demand for yarn is much below the produc-tive capacity of the mills, and that spinners have large stocks on hand. Short-time working expedients have he said, takes its stand on the "Haps burg Dethronement Law" of 1921. been tried, in order to reduce stocks, but these have been nullified to some extent by the action of individual spinners, who have sold at prices below the cost of production, and have thus added to the difficulties of those START PILGRIMAGE SEATTLE, Wash., May 28 (Special)

Two special trains of 20 cars left
here today over the Northern Pacific who hold out for a remunerative price.

This state of affairs led to a proposal that a joint council should be formed, with full representation for the operatives, as well as for the master spinners, for the purpose of imposing the strictest discipline on the whole of the spinning section of the industry. If the objects were at-tained, output would be regulated to the point at which equilibrium between demand and supply was gained, and anyone infringing the rules would be subject to penalties

Voluntary Discipline .

The difficulty, however, is to secure complete voluntary submission to such discipline. The remarkable re-Several stopovers are planned by Nile, the first at Yakima, others at sults of the strict wartime control

SPINNERS DESIRE

DIRECTIVE POWER

Thousands of Operatives Possess
Large Financial Interests in the Mills

Special from Monitor Bureau
LONDON, May 12—The movement which has been started with the object of bringing the cotton-spinning operatives of Eancashire into closer relation with the general administration and conduct of the industry, in a common effort with the master spinners to average of the master spinners to average of the industry, in a common effort with the master spinners to average of the master spinners to average of the industry, in a common effort with the master spinners to average of the master spinners to average of the scheme. The conditions are different now, and it is unlikely that the Government would legislate specially for any single industry on these lines. Consequently, the originators of the movement regard the close cooperation of the workers as vitally important. The leaders of the operatives hold very strongly that they ought to be actively engaged in cooperation with the employers in grappiling with the complicated problems of policy which affect the whole industry.

Whatever may happen in regard to this particular scheme, however, the general trend of events in the cot-

relation with the general administration and conduct of the industry, in
a common effort with the master spinners to overcome the serious difficulties which now beset the industry, is
of particular interest at a moment
when "Whitleyism" is being subjected to criticism from various quarters.

Whitley Councils have always
evoked the strong denunciation of the
labor extremists, but a week or two
ago the ranks of the critics were
igned by Sir Peter Rylands, who as thousands of the operatives have con-siderable financial interests in the mills as shareholders.

KENTUCKY WOMEN **BACK PROHIBITION**

State Federation Head Says Any Modification Is Opposed

LOUISVILLE, Ky., May 23 (Special Correspondence)-That the Kentucky Federation of Women's Clubs backs up prohibition enforcement without modification was the assertion of Mrs. Benjamin W. Bayless of Louisville, following her recent election as president of the organization at its Win-

chester convention. She said:
"There is absolutely no room for discussion in the federation as to the question of prohibition: We stand squarely behind the Eighteenth Amendent and the enforcement of the Volstead Act just as it stands."

The views of the new leader of the Kentucky clubwomen are valuable in view of the recent warning to the 10, 000 members of women's clubs in the just before her recent retirement as urged the women to be alert to propaganda and influences seeking their backing of "nefarious schemes" they should have no part in.

ARIZONA OWNERSHIP OF POWER FROM COLORADO RIVER SOUGHT

Opposition to Compact With Intermountain States Voiced by Political Interests-Glenn Canon Dam Planned

PHOENIX, Ariz., May 23 (Special Correspondence)—The political interests associated with Gov. G. W. P. Hunt not only have made declaration of hostility to the Colorado River compact between the intermountain states, but have determined upon pushing a plan for state ownership of hydroelectric power plants along the river in Arizona. These announcements have followed a meeting called by the Governor and now at recess till a special committee shall be ready with a plan for consideration.

The preferred idea appears to be

a plan for consideration.

The preferred idea appears to be that the State shall issue its bonds in a sum approximating \$40,000,000 and erect a "rock-filled" dam in the Colorado River channel at Glenn Cañon, conducting electric current therefrom for use at points within the State. The site is one which for more than a year past has been under exploration by the United States Reclamation Service and the Southern California Edison Electric Company of Los Angeles.

Reclamation Service engineers lately

reported that the canon walls were of stone unsuitable for dam construction. The electric company has made a statement that its plans involve construction of a dam that would be at least 500 feet high and that would back water about 130 miles, up into Utah, and that \$100,000,000 would be re-

quired.

An alternative plan has been presented by Gen. J. C. Greenway, manager of the Calumet & Arizona Mining Company, and of an enterprise which has announced its willingness to spend about \$30,000,000 in erection of one or more relatively small dams across the Colorado's channel at the mouth of

Barring a few postponements, fewer in fact than in most other springs, the first month and a half of the National Deague season has been played through. No genuine indication of how the clubs will finish is afforded in so short a period, but it is apparent to everyone that New York, champion of two seasons, has risen with more than its customary buoyancy, and that it appears even more formidable than in 1922. Partially offsetting this preponderance of the a renewed determination in the Piftsburgh camp, which has expressed itself in the matter of victories so far as to give W. B. Mc-Kechnie's outfit a percentage of .600. Such a rating as that would ordinarily entitle a team to the most serious consideration for pennant honors, but in view of the fact that New York is going along at a gait well near .800, the fine work of Pittsburgh is put some-

what in the shade.
Of the seven clubs that are making the race, therefore, without exces-Reds, who, with E. J. Roush's return, to share the title this year with B. yesterday, 17 points to 16. Sanges won the first match with foils, 5 to 4, while the matches with saber and epée were drawn, 12 and and ep 12 points, respectively. Two judge withdrew when the referee reverse their decision in awarding the point to Senac in the foils match, and t others withdrew in a dispute over awarding Sanges a point with saber.

SHAMROCKS WIN SECOND GAME WINNIPEG, Man., May 27 (Special)
—Getting a long lead of four goals on
the locals before the latter had found a
means of coping, with the tricky and
elusive visiting attack, Montreal Shamrocks Saturday registered their second victory in the three-game series with Winnipeg lacrosse clubs, defeating Fort Rouge, 7 to 3. Catching the Fortz practically off guard in the early stages of play, the eastern aggregation scored up a big margin, but instead of letting up, as they had done against the Tigers in as they had done against the Tigers in their first appearance here, they found themselves forced to play every minute of the way in order to keep secure in possession of the edge. The Forts pressed the Montrealers as they had never been pressed Thursday, and when the final gong was sounded it terminated a snappy, interesting, and hectic argument. hectic argument.

PITTSBURGH ONLY MANY SURPRISES FEATURE BIG COLLEGE TRACK MEET

California Defends Team Championship, Winning Only Mack's Men Have Shown New One First Place—Only Two 1922 Champions Defend

INTERCOLLEGIATE A. A. A. CHAM- which is now quite heavy with 15 pronship STANDING events. Syracuse Johns Hopkins

PHILADELPHIA, May 28-With the University of California championship track and field athletes on their way to Pullman, Wash., to take part in the Pacific Coast Conference champion-ship games next Saturday, after hav-ing successfully defended their cham-pionship of the Intercollegiate Associ-ation of Amateur Athletes of America on Franklin Field, Saturday, with a total of 39½ points as against 33 for Princeton University, their chief rival, the meet of last Friday and Saturday continues to be the chief topic of discussion among local athletic followers

No college meet in recent years has brought forth more surprises and up-sets than did this year's I. A. A. A. competition. No less than seven of the 1922 title holders were trying to defend their titles and yet only two of them succeeded. The successful ones were L. T. Brown '23, captain of the Dartmouth team, who again won the running high jump, and J. C. Taylor '23, Princeton, who defended his 220-yard low hurdle championship. J. A. LeConey '23, Lafayette captain and holder of the 100 and 220-yard dash titles of 1922, and Walter Higgins '23, Columbia, the two-mile champion, and A. G. Norris '23, California, pole-vault champion, lost their titles in Saturday's finals, while C. H. Hauers '23, Harvard, 120-yard hurdle champion, was eliminated in the preliminaries

Another interesting feature of the meet was the fact that California defended the title and yet won only one first place and tied for another. William Neufeld in the javelin throw was sive resort to the purchase of playing the only representative of the Golden talent, Pittsburgh alone seems to have Bears, who took a gold medal, while a chance—slight though it is—of over- A. Saturday—Boston at New York; Philadelphia at Washington; St. Louis at
Chicago; Cleveland at Detroit,

After all has been said and done where they were one week ago—in second place, and not far behind the league-leading New York team. "Wait till they meet the Yankees!" said the critics; and Connie Mack's men have met the Yankees, taken the best they have to offer both at the Bronx Stadium and Shibe Park, and emerged on the winning side on these direct con-flicts with the two-time champions. On this basis, if they played New York a little oftener, the gap between these two leading eastern clubs might very

Now New York is being afforded a little respite, with Washington as opponent, and the same can be said of the Athletics, for they are to entertain the last-place Boston Red Sox the first three days of the present week.

Of the other clubs, Cleveland is making a determined effort for recognition. The Indians have won two more games than they have lost and, outside

Washington leads the second division, and has fairly well-grounded hopes of going higher. The St. Louis Browns try hard but seem unable to get started in the right direction. The Chicago White Sox have picked up considerable ground in the last week, but they are still in seventh place, a Academy of Philadelphia in om. 39s. half game behind the Browns and a full game behind Washington. Boston's play has improved in some respects, but it is far from consistent and needs much bolstering, particularly in the infield department

accounting for the Yankees' success is the air-tight fielding of the chamthe only player on his team to win his match in the morning, defeating for M. J. Huggins' band. When the E. E. Murphy '23 of Purdue, 3 and Yankees excel in one department of Yankees excel in one department of the game, however, their superiority there usually offsets any falling-off that may occur elsewhere. They are potentially as brilliant as their neighbors the Giants, but not nearly so consistent, and brilliance plus consistency serves to better purpose than either one alone.

NEBRASKA ELECTS GARDNER
LINCOLN, Neb., May 28 (Special)—
Following the victory of the University
of Nebraska track team in winning the
Missouri Valley meet at Iowa, State
College, Ames, Ia., Saturday, M. F.
Gardner '24 was elected captain of
the track team for the 1924 season,
Gardner won the half-mile event in
the Missouri Valley meet.

JOHNSTON WINS TENNIS SINGLES

Californian Defeats Washer in Final Round of World's

ending after several long exchanges of hard base drives.

After being down, two sets to one, Washer made a wonderful recovery and never allowed Johnston to take the lead in the fourth set. Johnston appeared badly tired as the set ended, while the sturdy, athletic Belgian was

growing stronger.

Johnston waded into the fifth set
apparently with a determination not
to prolong the match further. He won his own service for the first game, and thereafter both exchanged games on services until the score was three-all. Then Johnston ran out three games and took the set and match.

Cochet played very poorly in the mixed doubles match with Mile. Lenglen, the latter time and again retrieving shots that had gone over his head, as he insisted on keeping close to the net.

The Lenglen-McKane match was a repetition of the numerous previous meetings between the two foremost women players of Europe. Both played carefully, remaining on the base lines and never venturing near the net. Mile Lenglen won, as usual, through superior steadiness on Miss McKane's errors after long rallies. Both girls lost their first service in

the first set. Then Mile, Lengten broke through the English girl's service and won her own, making it 3—1. Miss McKane brought the score to 3-2, and then Mile, Lenglen won two straight games at 5-2. Miss McKane took the eighth game after it had gone deuce several times. Then Mile. Lenglen won the ninth game and set

MERKLE "BIG TEN" SINGLES CHAMPION

Michigan Player Defeats Wilson After a 54-Game Battle-Chicago Wins Doubles

Special from Monitor Bureau CHICAGO, Ill., May 28—Today finds the universities of Michigan and Chi-cago sharing honors as a result of the competition for the Intercolle-giate Conference Athletic Association singles and doubles championships, which came to an end here Saturday with C. C. Merkle '23 of the University of Michigan winning over E. W. Wilson '25, University of Chicago, for the singles crown. Wilson, paired with A. E. Frankenstein '23, won the doubles title from N. H. Carran '23 and M. I. Shapero '25, Ohio State University.

In the singles match each man opened at top speed, winning his own service consistently and carrying the set to deuce. After an exchange of deliveries Wilson led at 7-6, but failed to capture the set. As the game score mounted Merkle continued to win on his service, but his opponent found it harder and harder to keep even. Merkle finally broke through the Chicago sophomore's service on the thirty-sixth game and won the set at the remarkable score of 19-17, a record for the Conference tournament. The Michigan player kept up his speedy service and hard driving in the remaining sets, while Wilson akened with each succeeding game. Merkle won most of his points on aces and kills at the net; Wilson relied on passing shots and placements from backcourt. The match, which lasted nearly four hours, went to Merkle at 19—17, 6—3, 6—3.

Wilson came back in the doubles

and, with Frankenstein as a partner, defeated Carran and Shapero of Ohio State in five comparatively quick sets.

The Maroon pair, who are joint holders of the Wisconsin state doubles title, had the net most of the time. and, except for occasional streaks of unsteadiness, volleyed and smashed effectively. The Ohioans made many splendid gets, but their lobbing and driving from the baseline were not quite strong enough to win. Chicago won at 6-2, 3-6, 6-2, 4-6, 6-4.

The match by points: FIRST SET

MICHIGAN WINS AND

BREAKS RECORDS

COLUMBUS, O., May 27 (Special)—
In defeating Ohio State University, 97½ to 37½, in a dual track meet on Ohio Field Saturday atternoon, the University of Michigan broke seven Ohio field records and one Intercollegiate Conference record. The Ohio field records were set up on the last day that that field is to be used in intercollegiate track events by Ohio State University. The new Intercollegiate Conference record was made in the broad jump by D. H. Hubbard 25, Michigan hurdler, and broad jumper. His distance was 24ft. 11½in. This is within four inches of the world's record, and surpasses the former conference record by 1ft. 1¾in. The Buckeyes took only two first places, coming in first in the javelin and low hurdles. Boni Petcoff 24, holder of the "Big Ten" Conference javelin record, won his event, and L. J. Snyder "25, Ohio State, carried first honors in the low hurdles, corried first honors in the low hurdles. Prosser, Michigan pole vaulter, went over the bar at 12ft. 7¾in., barely falling to break the conference record of 12ft, 8¾in. www. Michigan pole vaulter, went over the bar at 12ft. 7¾in., barely falling to break the conference record of 12ft, 8¾in. at which he was aiming.

Shears Is Winner of Fencing Title

Captures Epée Outdoor Title in Fence-Off With Waldhaus

NEW YORK, May 28—C. C. Shears of the New York Athletic Club is the holder of the outdoor epée fencing championship title of the United States for 1923. He won the title here yesterday after a great bout in an extra fence-off with D. B. Waldhaus of the Washington Square Fencers'
Club, in the final round for which five
of the original entrants qualified.

By winning the title Shears succeeds Albert Stauss of the J. Sanford

Saltus Club. The new champion won the intercollegiate foil championship while at the United States Naval Academy last year, and showed splendid ability with the epée in his bouts yesterday, meeting and defeating several more experienced fencers than himself. Walhaus is the present in-

tercollegiate champion. Henry Breckinridge, former Assistplace. Their strong forces, however, team and individual championships in ant Secretary of War, dueled his way brought in a majority of the seconds the Missouri Valley Conference golf to the finals by defeating five of his and thirds.

Four Conference records were Country Club. Robert McKee '23 de-broken, one of them twice, once in the fended his title for individual honors, Shears, J. C. Schaeffler of the N. Y. shooting the 54 holes in 226, six A. C. carried the veteran duelist a strokes lower than the runner-up, J. long way in the preliminaries, the

enfelter's points for first in this event saved Drake from a whitewash.

T. W. Poor '25 of the University of the list.

1135. Iowa State had only two enridge and Arthur Murray of the J. Santrants and they placed way down in the list. and Waidhaus each won three of their four matches, and were forced into a fence-off for the title. After 15 minutes of skillful and fast swordsmanship Shears touched decisively, his weapon ripping a three-cornered square a foot wide from his opponent's jacket. The list of entrants follows:

HARVARD CREWS ARE DEFEATED

Varsity Preparing for Yale Without Preliminary Victory

In nearly every respect, Harvard's 1923 rowing season has been and promises to continue to be a repetition of those which have gone before. Once more her varsity crew concludes its preliminary racing with a record of straight defeats, and once more a much buffeted coach points his efforts toward the four-mile classic at New London, June 22. The only thing, in fact, which differentiates this year from last is the almost total lack of doubt over the outcome of the impending Harvard-Yale struggle. For in that event a rejuvenated, confident, and apparently completely successful new Yale system will clash with Harvard system which parallels it only in the matter of newness.

There is considerable dissatisfaction in the rowing camps at Harvard today. The causes are manifold. Harvard's supposedly considerably improved varsity was, withal, still unundefeated freshman eight, the one bright spot in an unsatisfactory season, was handed its first defeat, and that in very decisive fashion. To add more the Crimson's second and third varsity crews trailed badly in the innior collegiate eight-pared shell race Crimson. The summary. at the American Henley regatta at Philadelphia, Saturday, displaying a brand of rowing which could not be pointed to with satisfaction. True, the Harvard third varsity won its special match with Princeton and Pennsylvania in the third varsity collegiate. race, but this encounter was of lesser importance than the one in which

Harvard took such a drubbing. Cornell has a crew this year which is not up to the standard of Ithacan crews of, say, the last 20 years. It had already been defeated by Yale, when it came to Cambridge last week, out it was still strong enough to defeat Harvard. The margin of vantage was 1% lengths, and the time 10m. The Cornell freshmen repeated this performance, increasing the distance in 10m. 20s.

Coach F. J. Muller had, admittedly, made distinct progress with his varsity crew, since it lost to the gamer, rugged crew Saturday, and it raced better. Still it lacked knowledge, stamina, finesse. Extremely rough water prevailed and the Cornell stroke used his good judgment. When the surface conditions are such as prevailed Saturday, it is almost impossible to do any real rowing. It is once it gets ahead of its opponents, too. Cornell, knowing this, fought

too. hard until it got out in front, then contented itself with staying, while the Crimson was fighting hard and gamely, but experiencing the natural inability to get a thorough hold of the water, especially when it got down into the rougher territory below the Harvard bridge. The race was a hard struggle, Cornell taking advantage of the better water at the outset to pile up her lead, which was about a length at the bridge. From there on it was simply a matter of staying ahead. Probably the best crew in the country could not have overtaken that Cornell eight in the last three-quarters of a

About the same thing was done in the freshman race. Harvard started with a rush, and it appeared for a time as if the doughty conquerors of the Navy and Princeton were about to add another victim to their list. Then Cornell got started. The eight

Bass. Meade & White, Paul P. Cret, Wilson

An architect may create a gem, but play. he can seldom govern its setting. Thus, a beautiful structure may find itself surrounded by monstrosities. man desires a beautiful home, or a analysis of some one beautiful hotel, he commissions an American architecture. Through the courtes: sive plan. Thus we have the proposed and partly executed plan for the mu-

seum buildings at the University of Pennsylvania by the associated archi-Eyre & McIlvaine, tects, Wilson Eyre & McIlvaine, Stewardson & Page, and Day & Stewardson & Page, and Day & The annual is, in fact, a general Klauder, or the Princeton and Yale Clearing house for architectural ideas, both projected and accomplished, and cordia Seminary, St. Louis, Mo., by Day & Klauder

The Question of Setting

tions and hospital groups have adopted power of those who finance great a like attitude, yet even a group of building programs to create from beautiful buildings may only serve to exaggerate the nondescript wreckage well-proportioned city. of their non-architectural environment. Cities are especially hampered by an architectural past from which it is difficult to emerge, and with a non-architectural present aggravated by the immediate need for many new buildings, by the desire speed in construction and by the fal-lacy of thought too prevalent among moneyed interests that a greater percentage of gain may be achieved through the neglect of architecture.

It is to be hoped that the present acceptance of a comprehensive plan in collegiate buildings will encourage the rapid development of city-planning, and a more cosmopolitan realization of the cumulative horror of ram-shackle and ugly building pro-jects. Somewhere it would seem there

Campbell McInnes, the English baritone who now lives in Toronto, undertook the training of the principals, and for non-professionals, their performances were remarkable. In the each other. Methods, and fashions in case of Mrs. Pearl Whiteside, who art, may vary, but the fact remains sang the rôle of Orpheus, few qualitation. Borwick and other players of fications in one's praise are necessary. She sang with beauty of fone and proper dramatic insight, and the rôle could not easily have been done

As it was the first time Gluck's As it was the first time Gluck's opera had ever been 'presented in Canada, there were no standards of production to follow, except those of the ballet from the opera introduced here by Pavlowa's Russian dancers and the Boston Opera Company some years ago, and the setting for that dance was much too elaborate to be helpful. The fine equipment of lights at the Hart House Theater enabled the producers to get beautiful effects the producers to get beautiful effects on the small stage. The scenes had to be done in miniature, and against massive draped backgrounds. The entrance to the under world and the Elysian fields were among the finest pictorial efforts that have been seen at the Hart House Theater, and that is saying a good deal. Charming and appropriate miniature ballets were

Philadelphia Orchestra

Will Number 107 Players PHILADELPHIA, May 26 (Special Correspondence) - Details are available of the make-up of the Philadelphia Orchestra next season. There will be 107 instead of 104 players. One new player, a French horn, is but 17 years old. He is a Philadelphia high school lad, named Isadore Berv. Mr. Stokowski heard him play and engaged him at once. There will be a second harpist, Frank Nicolletta, who was an occasional assistant last season. A double bass player, Fabien Kossewitzki, is a cousin of Sergei Kossewitzki, noted virtuoso on the same instrument. The new first same instrument. The new first clarinet player, Rufus Arey, comes from the same desk in the Detroit Orchestra. Joel Belov, a first violinist, returns from New York to his former affiliation. Two second violins as to 100 players. Mrs. J. J. Carter are from Philadelphia—Mayer Epstein and F. W. Blanchard, as last year, and Harry Feldman. Five of the 23 will manage the season. "Beauty in Utility," by Harland Bartholomew, city-plan engineer of St. Louis, who explained the present evolution of the city plan.

They are Weinberg, Gatti, Pitkowski nd Cohen, the violinists, and Gisikof the cellist. A new cellist is Bram Oberstein, of New York. There are still places open for four violins, two violas, two basses, two trumpets, one

LONDON, May 15-When Leonard Borwick announces an all-Brahms program, as he did for his pianoforte recital at Æolian Hall on May 7, both he and his audience can be sure of probably the nearest equivalent now available to the readings which Brahms himself heard and subscribed to. So a large gathering of faithful "Brahmins" (as Rolland dubs them) came to hear Mr. Borwick play the Variations on an original theme in D, Op. 21, a handful of the most characteristic Intermezzi, the Capriccio in C sharp minor, Op. 76, the superb Rhapsody in B minor, Op. 79, and the Variations (Studies) on a theme of

Paganini, Op. 35. Years ago—in 1891 to be exact— Borwick played Brahms' D minor Concerto in Vienna, and the composer wrote afterward to Frau Schumann that "Borwick played quite excellently, with the most perfect freedom, warmth, energy, passion, in short everything that one could desire."

Time has wrought changes. Borwick has dropped some traits, and developed others, as for instance, his calmly cultured philosophy, and his "re-clusiveness," which though not without their uses, refrigerated his playing of the B minor Rhapsody, and seemed to put some of the Intermezzi under the microscope. In the F minor Son-ata, however, he "played quite excellently," and his performance of the Andante, with its romance and stirring climax, was outstandingly beauti-

Hollywood Bowl Concerts

STEEL INDUSTRY HEADS LOOK FOR CONTINUED BOOM

See No Slackening for Remainder of 1923-Price Trend

Lower

NEW YORK. May 28 (Special)—Attendance at the semi-annual meeting of the American Iron and Steel Institute at New York Friday was a good antidote for any pessimism that might have prevailed in regard to the steel industry.

Many of the leaders of the industry,

including Judge E. H. Gary of the United States Steel Corporation, expressed almost complete satisfaction as to the present state of the industry and predicted no decline during 1923.

Two of the speakers commented on the fact that New York, particularly Wall Street, was the only spot of pessimism in the country. The mid-dle western steel makers were especially enthusiastic over conditions.

Steel Heads Hopeful

was the consensus of opinion that there will be no slackening of steel business in at least six months; that the falling off of buying here and there was helpful rather than otherwise; that present price levels are fair, both to the consumer and producer.

One of the best arguments point-ing to sound conditions is the fact that no attempt has been made on the part of consumers to cancel contracts; very few have urged ship-ments to be deferred until a later date; several have asked deliveries to be made sooner than the contract

Contracts have not been canceled in spite of the fact that steel can be bought more cheaply today than when many of these contracts were signed. On the other hand in late 1920 and early 1921 hundreds of cancellations were turned into the mills and chaos and disorder followed.

The second important conclusion of the gathering was the adoption of the report of the committee which investigated the feasibility of installing the eight-hour day in steel mills. The committee, which was headed by Judge Gary, concluded that it would not be wise at this time for all steel companies to inaugurate this system. It would mean an increase of 15 per cent in the cost of steel making.

An outstanding feature of present conditions in steel is the coincidence of prices of the Steel Corporation and those of the independents for the first time in about a year. In March, 1922, time in about a year. In March, we independent levels were far below those of the leading interests, signifying. Meanwhile the world's production continues to increase. latter part of 1922 the inde-

3.85c. Premium prices for prompt dustry continues a heavy user for deliveries have disappeared through-

The most striking example is in steel plates which now sell almost universally at 2.50c. a pound, Pittsof traders, consumers having shown burgh, where a month ago the independents were getting invariably 2.75c. Such uniformity of prices is considered a very desirable condition. High premium prices are unnatural and apt to be followed by a harmful reaction.

The manner in which production holds up nearly to practical capacity age. Though March and April were into blast than are being extinguished. The latter takes place only in case of mechanical disturbance and not because of any economic reason.

trend of prices is still downward, especially in raw materials. \$1.12%@1.13, were followed by a mod-Iron and steel scrap has continued to erate setback all around, and then fall an average of 50 cents a ton per week for the last two months and authorities do not expect a rally before September. Coke prices continue to yield. Connellsville coke operators have settled upon a contract e for third quarter furnace coke at \$6 a ton, as compared with \$7 prevailing for second quarter.

Copper Still Sagging Spot furnace coke can be had at \$5 Foundry grades range from \$6 to \$8, depending on brand. Pig iron prices are yielding slowly in all producing centers except eastern Pennsylvania. Buffalo iron has sold off \$1 at \$28; Virginia iron, off 50 cents at \$28; Birmingham iron off \$1 for delivery into middle west, at \$26, furnace; valley iron off 50 cents to \$27.50, furnace for basic, and \$29.50 for other

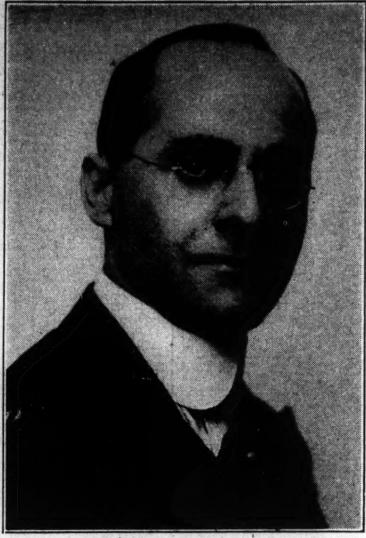

Generally speaking, the nonferrous metals are in a weaker position than they were a week ago. Copper has all of its gains made on the rally. At the end of the week before last the price firmed up to 15½ cents delivered with some sales at 15% cents. Today the metal can be had at 15% cents and gives promise of going down to at least 15 cents. Germany is consuming only one-quarter of the copper which that nation was using a year ago and Germany is the biggest foreign buyer

of American copper.

It is not believed that German use would improve much if the Ruhr problem were settled. That nation has mainly replenished its needs caused by the destruction of war. It has gone back to substitute metals, such as aluminum and zinc in some cases. American copper production is as heavy as at any time in peace periods and there is some danger of overproduction unless the present low price holds, in which case some pro-ducers will not find it profitable to

Zinc Demand Almost Nil

Zinc has been declining drastically after the rally of the week before last. Prices had been put up to 6.75 cents a pound, East St. Louis, mainly because of the more optimistic feeling of producers. The consumers did not support this attitude, however, so last week found the metal back to 6.35

John G. Carriker

TOHN G. CARRIKER, who has just been appointed manager of the new Havana (Cuba) branch of the First National Bank of Boston, is a man of wide experience in Latin-American banking. In his many years of service in foreign banking fields he has managed branches of the National City Bank of New York and the American Foreign Banking Corporation

in Rio de Janeiro, Pernambuco and Buenos Aires.

When 16 years old Mr. Carriker began his banking career as a messenger in a Kansas City bank. His banking education has been a sound one for he has worked his way up from the bottom, gaining experience and growing in executive ability with each advancement. He has held the positions of auditor, credit manager, cashier and manager, and at one time was a national bank examiner.

Speaking of the work before him in Havana, Mr. Carriker says: "My mission is to establish a branch that will furnish every facility required by New England merchants and manufacturers to handle and expand their trade with the island republic. Cuba is already the largest Latin-American customer of the United States and the opportunity to dispose of New

and is higher than a week ago. New pendent prices were much higher and have continued so until the last week or two.

York prices range from 7.25 cents to 7.50 cents a pound, the last applying to immediate delivery from second Prices Are Uniform

As a matter of fact one item, black steel sheets, are selling \$2 a ton lower among independents, or at 3.75c. a pound, Pittsburgh, as compared with 3.55c. Premium prices for promet dustry continues a beauty of the steel sheets.

Tin has fluctuated aimlessly be-tween 42 and 43 cents a pound, the

RALLIES SLIGHTLY AFTER A DECLINE

CHICAGO, May 28-Better weather cord months for all time in produc- conditions and a break in prices at tion of pig iron and steel ingots it is Liverpool had a bearish effect here on probable that May will rival if not surthe wheat market today during the early dealings.

Opening prices, which varied from unchanged figures to %c lower, with July \$1.14@1.141/8. and September

something of a rally After opening \(\frac{1}{4} \cong \) c lower, July 76\(\frac{1}{4} \) @76\(\frac{1}{2} \c), the corn market declined a little more, and then rallied somewhat.

Oats went under the season's lowest previous price for September delivery. lower, July 40% @41c. Later the decline became general. Provisions were lower.

EDWARD G. BUDD MFG. CO.

6% Sinking Fund Convertible Bonds Due February 1, 1938

In the first four months of this year, alone, the Company earned more than 21/2 times the full year's interest requirement on its funded debt. On an annual basis this is equivalent to over 45% of the total face value of the debt.

The Company is the world's largest all-steel automobile body manufacturer. Its earning power is strong; its financial condition sound; and its management efficient. The price of 95 and interest to yield over 61/2 % is very attractive for a bond so highly recommended. May we send you a descriptive circular?

L. R. STEEL CO.

NET ASSETS ONLY

THREE MILLIONS
BUFFALO, N. Y., May 28—A statement issued by the banakruptcy trustees on the affairs of the L. R. Steel organization, shows total assets as of March 7 of \$5,178,447.26 against which are liabilities of \$2,090,302.27. This means that the 60,000 stockholders are owners of surplus assets of \$3,089,144.99, all that remains of investments which are said to have amounted to more than \$20,000,000.

The Canadian receiver states that it is his belief there probably will be an equity in excess of \$1,580,000 in the Steel enterprises in the Dominion.

The receivers say that it now is impossible, owing to the complicated nature of the estate, to make a fully detailed statement. The figures submitted are characterized as a provisional statement of assets and liabilities.

There still are reports of receivant.

There still are reports of reorganization, but nothing has yet taken form.

CONSOLIDATED MACHINE TOOL Since the Consolidated Machine Tool Corporation of America took over the operation of the constituent plants in July, 1922, progress has been steady and rapid, sales and unfilled orders on hand showing a gain in practically every month. Monthly sales have increased from \$149,000, in August, to \$404,000 in April, with unfilled orders on hand May 1 amounting to \$1,242,000.

Total Bonds

Pursuant to an Act of the Legislature of Massachusetts, the Boston Elevated Railway Company is now under public management and operation, which will extend in any event until June 30, 1928, and thereafter unless and until terminated by action of the Legislature, on two years' notice. The Act further provides that if and when public control is terminated and the Company returned to private control, rates of fare shall nevertheless be continued which will provide cost of service as outlined in the following paragraph.

There are five public trustees appointed by the Governor of Massachusetts to manage the Company, and they are required by the Act at all times to fix such rates of fare as reasonably to insure sufficient income for all operating expenses, taxes, rentals, interest, depreciation and other proper charges against income or surplus and to pay the stated dividends on the preferred stocks and dividends of 6% on the common stock.

The constitutionality of this Act was confirmed by the Supreme Judicial Court of Massachusetts on April 3, 1919, whose decision was upheld by the Supreme Court of the United States on December 5, 1922.

Earnings and Expenses Year ended April 30

Gross earnings Operating expenses, taxes and miscellaneous charges..... Net earnings \$10,965,233 Rentals of subways, tunnels and leased roads...... \$2,257,308 Annual interest on funded debt (including \$180,000 for this issue) 2,403,270 4,660,578 Balance 6.304.655 Depreciation 2,004,000

Net earnings over 21/4 times rentals and interest on funded debt

Balance

Of the proceeds of this issue of bonds, \$700,000 will be used to reimburse the Company for money used to pay at maturity, on January 1, 1923, a like amount of West End Street Railway Company Debenture 41/2% bonds. The balance will be used to provide for extensions to the Company's power station in South Boston, for new shops in Everett and for the George Street storehouses in Somerville.

We recommend these bonds for investment

Price 98 and interest, yielding about 6.25%

UNEVEN PRICE TREND IN NEW YORK MARKET

Some Issues Record Good Gains and Others Move to Lower Levels

Speculative sentiment was again bullish at the opening of today's New York stock market. Buying of high-grade rails was one of the early features, Atlantic Coast Line leading the advance with a gain of two points. New York Central, Atchison, Union Pacific, Baltimore & Ohio, and Reading all opened fractionally higher.

Some irregularity took place later, Republic and Bethlehem steels, Baldwin, U. S. Rubber, American Smelting, California Petroleum and Cuba Cane Sugar preferred dropping 1/2 to nearly 11/2 points on profit-taking by recent

The advance was continued, however, in other quarters. Heavy buy-ing of Mexican Seaboard stock and certificates, each of which advanced 2% points, was one of the features. Houston extended its gain to 2% points, and Marland moved up 1.

Gains of 1 to 2 points also were recorded by New York Central, Reading, American Water Works, Colorado Fuel, American Metal, Du Pont, Mack Truck, Stromberg Carburetor, Stewart Warner Speedometer and American Agricultural Chemical preferred.

Foreign exchanges opened irregu-

lar. Demand sterling eased slightly to \$4.62% and French francs ad-vanced 2 points to 6.63 cents. Ger-man marks established another new low record at .001614 cents.

Rails Well Bought

Professional bear selling of a number of recent speculative favorites, which yielded 1 to 3 points before substantial buying support set in, was more than offset by the brisk demand

foreign group with a rise of 3% points. Industrials also were in great favor, American Agricultural Chemical 71/28

Ss were off 1½.

stantial buying support set in, was more than offset by the brisk demand for railroad shares founded on the unusually favorable nature of the latest batch of April earning reports.

Atlantic Coastline was run up 31/4 points and Pittsburgh & West Virginia, United Railways Investment preferred, Atchison, Canadian Pacific, and Union Pacific rose 1% to nearly 3 points.

Other strong spots were American Waterworks & Electric, Colorado Fuel, and Public Service of New Jersey, each up 2 points or more. California Petroleum, which advanced nearly 20 points last week, was driven down 3 points, and losses of 1 to 2 points took place in Allied Chemical, Studebaker, Kelly-Springfield, General Asphalt, American Can, U. S. Smelting, U. S. Alcohol and Atlantic Gulf & West Indies, the last named re-establishing the new low for the year at 14%.

The demand for rails resulted in subsidence of selling pressure around midday.

SLIGHT SEASONAL SLOWING UP OF BUSINESS SEEN

Special from Monitor Bureau

WASHINGTON, May 28-A slight slackening of business activity, ascribed to normal seasonal fluctuation, marked the last of April and the first weeks of May, according to the monthly survey of the Federal Reserve Board, issued today. Production of the Nash 78 2003. 1034 Louis & Nash 78 2003. 1034 Louis & Nash 78 2003. 1034 serve Board, issued today. Produc-tion and trade continue in large volume, however, the seasonal decline in the basic industries being placed at

awarded, attributed in the report chiefly to the curtailment of new 62½ projects in New York, a slight de-crease in production of lumber, anthracite coal and mill consumption of marked the month, with a consequent increase in car loadings over the corresponding period of previous years.
Shortage of freight cars, according to the Federal Reserve Board's find-

ings, has largely disappeared. ments during April and increases in wages announced by many concerns. It is estimated that the average weekly earnings of factory workers have in-MK&Tnew... 12% 13% 12% 13% 12% creased about 1 per cent.

WASHINGTON, May 28-The De-WASHINGTON, May 28—The Department of Commerce reports imports during the month of April \$41,000,000 in excess of exports.

The total value of imports during April was \$367,000,00 compared with exports of \$326,000,000.

For the first four months of 1923, the imports amounted to \$1,398,321, compared with exports of \$1,309,499.

compared with exports of \$1,309,499,-962, making an excess of imports for the quarter of \$85,894,359.

NORTH AMERICAN'S YEAR The North American Company and subsidiaries for 12 months ended April 30, 1923, show a surplus of \$12,643,642 after taxes, interest, and preferred dividends, but before depreciation, equivalent to \$5.47 a share on 2,311,630 share of common stock, compared with \$6.498,582, which, computed on the \$10 par value common, was equal to \$3.87 a share on 1,718,240 shares in the previous 12 months.

LONDON QUOTATIONS

LONDON. May 28—Consols for money here today were 58%, Grand Trunk %, De Beers 14%, Rand Mines 2%. Money, 1% per cent. Discount rates—short bills, 2% per cent; three months' bills, 2@21-16 per cent.

EDUCATIO.NAL

The Dehumanizing of Education

Marlborough, Wellington, Clifton and Cheltenham, to name only no provision had been made since the great outhurst of educational activity in Tudor times. And meanwhile the population had increased from five or ix millions to forty-odd. Obviously the time was ripe and the seed sown by Arnold and others bore fruit in due season.

Prussian Pattern

Great praise is due to these pioneers and Arnold in particular in fortunately, however, the pattern for him was laid up in Germany. Germany was his spiritual home educationally speaking. One German State particular-Prussia conscious of its deep humiliation under the first with vivid memories on his university Napoleon was making giant strides. education, not so much to a professor And its progress was mainly due to "at the other end of the log," as to its army-system and its intricate or- his football team in its winning game, ganization of schools. Germany had or the senior play in which he starred, been the first of modern nations to or, perhaps, to the special number of realize the importance of education. the college paper of which he was The schoolmaster, as was said openly in the land, had won for Prussia the battle of Königgratz and the hegemony of Germany. The two great systems were intimately connected. The magnificent army-organization with its iron discipline cast its reflection on the schools. The schools were to be the seed-bed of the "nation-inarms." To that end the teachers and scholars were to be drilled to march at the word of command, to carry the banner of German "kultur" in triumph over all nations, "organiza-tion" was the first and last thing. The watchword was "thorough." Now thoroughness is a fine thing but it is not an end in itself. Thoroughness for what? We have heard of "thorough" scoundrels! And is it not cer-tain now that this very thoroughness led straight to "1914" and all that

Floods of Organization

to other countries as well—for the Scandinavian nations for example tivities? On the other hand, how can where a less rigid system of education was rather growing than being stricted from holding more than his made—a system which left room for share of offices? Such questions affect- sponsible—able to see the spontaneity and initiative in teacher and taught alike. However, regrets career of hundreds of students are beare futile. What we must consider is ing answered to some extent by the the situation now. The act of 1902, adoption of the point system, the charter for secondary education as salaries far in advance of what could ment of their scholastic standing. be earned by the large majority of teachers. The machinery compelled tem is quite well established, others admiration—but what of the man? are devising such a plan. Settlement, it has been repudiated by several local authorities and fierce contests have followed—even strikes!

And what of the effect on the children? And all this because of the primary neglect to realize that the "proc-But the chaos of higher education was ess" of education is a "human" matter, too gross and palpable to be neglected personal, spiritual; arising from the for ever. The richer classes of the community had already realized the situation and taken important steps to mend it. Side by side with the carlier "aristocratic" foundations of Eton, Harrow and Winchester a series of modern public schools surang into of modern public schools sprang into ate insistent problem before the country is to "humanize" education more, to give to the teacher his free-dom, the artist's creative joy—and this a few, date from mid-Victorian days. dom, the artist's creative joy—and this But for the general public practically within the vast framework of a state

The "Point System" for Extra Curricula

THE gradual adoption in American colleges and universities of the "point system," a system, that 's to say, designed to regulate extrathat he saw what was hidden from curricula activities entirely apart from most of his contemporaries. Un- the academic work, is a natural byproduct of the growth and the enlarged scope of these institutions of higher learning.

The "old grad" of today looks back editor-in-chief. Gradually extra-curricula activities such as these have so invaded the college campus that a student, though ranking scholastically high, considers his college career in-complete if he cannot take an active part in some of this nonacademic work. Indeed, to enter into that great complex of campus activities, dra-matic, literary, journalistic, or ath-letic, where one has the chance to develop one's own particular talent, to exercise initiative, to assume responsibility, to think individually and to co-operate collectively-an experience not found in mere book learning
—is to enter actually into a miniature commonwealth, an invaluable preparation for life experience.

Offers a Solution

This enlarged scope of the university brings with it a new problem to solve. How is the lone student in a It is permissible to regret that big institution of 8000 students to find Arnold had not turned his attention his way into these extracurricula acthe popular, capable student be reing seriously as they do the college

of caps and gown worn by the clergy, who then composed nine-tenths of the student body, began to be retained by the college students when civilian styles were rapidly changing. There were no steam radiators in those college halls and chapels of long ago, and the students found caps and hoods and capes exceedingly comfortable.

Adding a Bit of Color

and Scotland, the costumes at length rivaled those worn by King Solomon.

College students and professors in early American colleges were too hard up to go in for many of the frills of collegiate life, but long before the revolution some American faculties had imported the custom from Oxford and Cambridge. Old King's College, now Columbia, brought over the rules for academic costume enforced at President of Castalia Literary Society 12

t commencement. Then in 1886 Harversities for a thousand years. It was, in fact, noted that this peculiar type of "dress parade" even increased attendance at commencement a consumation devoutly to be wished.

A Commission Formed

It was, then, only natural that when in 1893 an intercollegiate commission on academic costume was formed to standardize gowns and hoods, there should be widespread approval. Some noted men were on that commission—not experts in the tailoring or men's furnishings business-but certainly experts in matters educational. The commission constructed its tentative draft of the gowns and hoods for the various degrees and tackled the problem by combining colors of any university in the hood lining through the use of heraldic chevrons.

The commission's code had been completed and was receiving rather

From some quarters objections are made to this means of regulating activities on the ground that it allows too great a chance for politics among fraternities and sororities. For instance, fraternities frequently com-This is taken care of at Wisconsin

Meeting Objections A further objection is that those in subordinate positions not carrying points are less willing to work. In this connection the following statement was made to the writer by a prominent dean of women: "When only chairmanship and offices carry points, I think it sometimes results that the students are less willing and responsible than they should be in subordinate positions. I have been staggered at the way a chairman was left to do the whole of a piece of work except for the help from personal friends to attempt big jobs. Possibly this could be remedied by the apportionment of a small number of points to membership as well as chairmanship of committees as it is done at the University of Michigan. In the Women's League there, 1 point is allowed to a member of a committee, 2 to chairmanship of a minor committee, 3 to publicity chairman, 5 to vice-president, and 7 to president. In Michigan 10 points constitute a quota. There may be other unsatisfactory features. There may still be isolated students leaving a university after four years of "grinding" without ever having so much as attended a single

brought with it changed conditions of 12 years, a fully equipped traveling living, and the science of the home van has been introduced by the traintook on a new perspective. It did not die, as some pessimists affirm.

Girls of good family now learnt their course of housecraft away from home, Queen Victoria herself setting the fashion by sending her daughters, when young, to the National Training School of Cookery, in Buckingham Palace Road, while artisan mothers in cottage homes noted with interest their small daughters' progress at the domestic "centers" then beginning to be attached to the schools in each

The efficiency of these "centers" was usually in direct proportion to the type of training school established in the locality, the students from which eventually "fed" the surrounding schools. The domestic science training colleges in some of the northern provincial cities, including Edinburgh and Glasgow, for instance, are excelient examples of the standard of instruction which prevails in the district. The Gloucestershire School of

Domestic Science is one of the oldest in England, and here in excellence of the training during the last quarter of century has borne abundant fruit in the revival of housecraft among all grades and classes. The necessity for training teachers soon became apparent, so that a modest suite of rooms was opened as a training center There are now four large kitchens,

ART NEWS AND COMMENT

International Water Color Show Opens in Milan

show of water colors. It may be strange for foreign readers to see this announced as an important event in the field of art, but it has to be remembered that water-color painting in Italy has not got the long, solid and continuous tradition that it has

This method of painting, if it has been practiced at all, in Italy has only been undertaken by isolated artists and it is only about ten years ago that Signor Paulo Sala, himself a clever water-color painter, succeeded in col-lecting around him his colleagues to form a society. This society has since then developed so much and so well that it has now been able to attempt to organize the first international ex-

hibition of which we write.

The exhibition fills seven large rooms of the Palace of Fine Arts. On French, Austrian, Hungarian and Russian artists. The British group is, certainly, the most noticeable of the whole exhibition. Most ably organized by Mr. Selwyn Brinton. it Hely Smith, A. Savory, A. Airy, C. Hunt, Lancester, W. Wood, Monat Lindner, Hugh Stanton, M. Russell Flint, G. Clausen and, though not very

numerous, is of a high quality.

It shows clearly that water color must be developed within its limitations, that is to say, it should be a light, fresh, luminous piece of decora ion and not attempt to rival the more complex method of oil painting. This, let it frankly be admitted, is the fault of the Italian water color painters. Their skill is often very great, and succeeds in overcoming serious difficulties, yet the effect of these large paintings, heavily framed, is not always satisfactory because, in the ambitious attempt to rival oil-painting the peculiar charm of transparency ries which is to given by water color is often lost, every two years.

San Francisco, May 12

Special Correspondence

Milan, April 27
Special Correspondence
HE Society of Water Color Painters of Milan has organized, for the first time in Italy, an international

skill.

For the present we must note only a few names among the best. First of all Signor Sala who has succeeded of all Signor Sala who has succeeded wonderfully in giving us the difficult effect of the interior of St. Mark's, full of mysterious shades and sudden lights. Some remarkable results are obtained by Signor Vinzenzo Irolli in sketching, with bold strokes, Neapolitan types and street scenes; while a young man of the Abruzzi. Tomaso Cascella, defines with delicacy the contour of his landscapes, kept in a contour of his landscapes, kept in a subdued and silvery tone. Pavan, a Venetian, follows, again, a quite dif-ferent system; he covers the white paper with very intense color and thus obtains deep harmonies which remind us of stained glass. Another painter still, Viviani, seems to carry water-color painting into the soft effect of a pastel by washing his paper

ganized by Mr. Selwyn Brinton, it counts among others such names as Hely Smith, A. Savory, A. Airy, C. all if this examination did not carry us, perhaps, further than the impor-tance of their results. For this reason we must content ourselves by naming only Signor Fratino, Belloni, Moretti Foggia, Schiffi, Limongelli, Biasi, Lon goni, Priovano, and Rossi, all of whom show remarkable work.

As has been said, many nations are represented in the foreigners' section; the Austrian and Russian being, with Harta, Merkel, Novak, and Grigoriew the most startlingly modern, while the French, with Emile Barnard, bring us back to old-fashioned classicism, Among the rest we notice the Swiss, Rüegg, for his landscapes, and Chiesa

for a delightful nursery scene.

This exhibition is the first of a series which is to take place in Milan

to a place on the wall at the San Francisco Bohemian Club and doubt-less will fall into right relationship when placed on the walls originally intended. It is rich in lore and history, incident to the Bohemian Club and California, yet curiously the myth depicts medieval figures in accurate costuming of the middle ages.

"The City," From Painting by Bertram Hartman

New York City Picturized

Special from Monitor Bureau New York, May 26 ANHATTAN ISLAND'S metamor-

phosis from the gentle rurality cosmopolitanism and skyward splendor of today is vigorously set forth in an exhibition of paintings, water colors, drawings, etchings, lithographs, photographs, and old prints of New York City, arranged by Louis Bouché, director of the Belmaison Galleries at Wanamaker's, to be seen there until the middle of next month. Thirty or more old prints, some dating from 1823, preface the exhibition and show the original city from surrounding points of vantage; they depict the simple grace and dignity of its historic edifices, the general spa-The same tone and understanding clousness of setting—gardens, parks,

and outlying farmlands—and the activities of river way and harbor, in vivid his usual heartiness through overand almost unbelievable contrast to the much preoccupation with detail, the bristling forest of stone and steel that latter's etchings of East Side typeshas since overgrown its green acres classics of their kind-running circles of a century ago to the brisk and practically obliterated all trace of the original city.

since set the pattern for such work and it remained for them to carry these processes on to still greater re-finement if possible. They had no concern with problems of interpretation and æsthetic reaction; normalcy and established tradition were the order of the day. They had no ink-ling of the extraordinary transforma-

the whole gamut of pictorial expression. George Bellows has contributed a number of large canvases and some of his dramatic black-and-whites; his of his dramatic black-and-whites; his William Zorach, Abraham Walkowitz, "Gramercy Park" is a veritable tour and John Marin, and still more which "Gramercy Park" is a veritable tour and the long success he has must be left unclassified. had in painting the Hudson River and the Palisades is brought to mind with the Palisades is brought to mind with his handsome "Warships on the Hudson." "Luncheon in the Park" and "Splinter Beach" are unsurpassed for racy incident and definite action. Robert Henri's canvases, done 20 years ago, have passages of fluent painting yet withal seem curiously remote. Leon Kroll and John Sloan are decorative and descriptive each in his own way, the former's compilations

The Freak in Art

tor in the lives of men and women living in a sordid district of London. It she had added to her works of charity and the news had been cabled across the Atlantic, that would have been one thing. But it is surely quite another to magnify into an event of importance this academic success with a painting for which, according to the dispatch, her only preparation has been a few lessons and some little experience with water color. The interest, evidently, is not in the merit of the painting but in its being the performance of someone who is not a protor in the lives of men and women liv-ing in a sordid district of London. If formance of someone who is not a pro-fessional artist. Once, in the near past, tourists in

Antwerp flocked to see the artist who, being armless, painted with his toes. In Philadelphia, for a while, the prodigy was a girl, unable to use her hands, who held her brush in her mouth. Or another marvel greatly in favor is the painted imitation so faithful that the painting might be mistaken for reality—the latest exaggeration of the classic tale of the painter's cherries so true to life that birds came and pecked at them, or of the curtain which another painter was asked to draw aside to allow his visi-tor to see the picture behind it. Today, imitation in art is at a dis-count. The artist is said to be too preoccupied in expressing himself to trouble to express his subject. And yet in the recent exhibition of the yet, in the recent exhibition of the Independents in New York one of the pictures that held the crowd and was promptly labeled "sold," was an exact copy of a page in an old magazine

A PROBLEM I have never hitherto succeeded in solving is why people have developed such a fancy for the freak in art. A great master produces a masterpiece and the fact is taken, without excitement, as a matter of course. The Madonna of the new Cimabue would today run small chance of a triumphal procession through the streets. But let someone who has not been trained as an artist or who has not the necessary qualifications, paint a picture or model a statue, and the marvel is in everyone's mouth.

Only the other day, a special paragraph in a prominent place in the front page of a leading New York paper was given to the fact that Mrs. S. A. Barnett, at the age of 71, had produced her first painting in oils aph that it had been immediately accepted by the Royal Academy. Now, Mrs. Barnett is a most estimable lady. She and her husband, Canon Barnett, worked hard for many years in the East End of London, did much good there, and struggled to make art a factor in the lives of men and women ilving in a sordid district of London. If

the same surprise to be had in it as in the neat manipulations of a bicycle by the tramp who began by failing from it like a clumsy oaf, or in the dazzling flight of balls kept up by the foreign juggler from whom, be-cause he is a foreigner, nothing much was expected.

Not until the close relation of art to life is made clear to him will the average man wipe the cobwebs from his eyes and see the facts plainly for what they are. Periods have been when art did enter into the people's life more intimately and familiarly then it does in our day of review and football, and then the artists, no less than the multitude, were the better for it. But the question is whether the freak has not got so strong a hold upon the public that even were the intimacy, the familiarity, to return, it would still retain its charm? I won-

FORUM

tion with the Courteous Reader, Mr. Archer makes a distinction between the conversation and the interview, the chief difference being that in the interview the interviewer "seeks merely to draw his subject out," while in the conversation there is "an exchange of ideas between two people equally interested in the subject of discussion." "Along with the Essay, the Treatise, the fictitious Dialogue, the Speech, the Poem," says the author, "I suggest that the Conversation and a right to take its place.... tion has a right to take its place. . . These pages contain a series of experiments in which certain distinguished men and women have most generously aided me in trying to make good the capabilities of a form hitherto but little cultivated." The idea seems to me to be excellent: indeed, what is Boswell's "Johnson" but a transite conversation? But it is gigantic conversation? But it is not likely to come into general use because we not only have no Boswell and no Johnson but have few men capable, like Mr. Archer, of holding their own in dialogue with twelve distinguished persons of widely varying interests. Some enterprising man or woman possessed of rare powers of persuasion and tact might, however, achieve a similar result by arranging conversations between pairs of notable people, taking down a report in shorthand of what they said. Such a conversation between Mr. Mencken and Professor Sherman on literature in America, or Mr. Edmund Lester Pearson and Mr. A. Edward Newton on book-collecting, or between Mr. Shaw and Mr. Chesterton on thingsin-general, might be productive of results—not to say of pyrotechnics.

But to return to our book. twelve good men and women who con-versed with Mr. Archer were as follows: Arthur Wing Pinero, Thomas Hardy, Mrs. Craigie ("John Oliver Hobbes"), Stephen Phillips, George Moore, W. S. Gilbert, Professor Masson, Spencer Wilkinson, William Heinemann, George Alexander, Mrs. St. Leger Harrison ("Lucas Malet") and Sidney Lee; or, in other words, three playwrights, as different as possible, four novelists, equally different two men of letters, an actor, a states-man, and a publisher; and none of them by any means forgotten today. Such a group could hardly fail to say many interesting things; but what has particularly struck me in re-reading the book after many years is the fact that the subjects which they discussed are being discussed today with quite

Some Recollected Conversations

Twenty years ago william Archer as much animation as they were beling discussed twenty years ago.

Sine, a series of conversations with noted persons. They were collected, in 1904, in a book with the title "Real in 1904, in a book with the title "Real Conversations." It is time someone got out a new edition.

the full, and sometimes, one thinks, on the gayest of dress—light, alry, and exceedingly decorative. to excess, in elaboration of detail; one feels as if they were loth to lay

down their needle till every available corner of the plate had been exploited. Others again lean to the opposite extreme, leaving much of the intended effect to the virginal paper. Stubbe Teglbjorg belongs emphatically to the latter category, which is evidenced, both by his expanses of placid unruffled water in some of his efforts daisies and the gleaming buttercups, what Gamaliel Bradford accomplished gressed. We are nearer the repertory Nash Lights, and still the ship raced and by the white snow fields in others,

The scene has been very ably rendered, the highly decorative blackness of the tree and the overhanging branches emphasizing the pure whiteness of the snow. It is an exceed-ingly well conceived arrangement, if one may so call it, demonstrating the artist's gift of choosing and handling a motif in an adequate and pleasing manner, and with comparatively sini ple means, in complete harmony with some of the best traditions in Dan-

Plover's Brook

Near my own particular Flower-Patch, high up on the sunny side of one of these hills, there happen to be several rivulets with whom I am on visiting terms. One of these not only supplies my own house and garden with all the water needed, but also a near-by cottage and several wells en It starts life in a rock-strewn wood,

near the top of the hill, where it bubbles out from among a confusion of great, mossy boulders, unseen in summer until you search for it, being heavily shadowed by long fern fronds that bend over it protectingly, with an almost human intuition of the need to shield this baby-brooklet from the flerce, absorbing heat of the sun. Life in the quietudes, however, accustoms one to utilize hearing as well as sight, and a stream is bound to sing, or at any rate to prattle, as 't passes on its pleasant way; thus it invariably betrays its whereabouts, no matter how closely the fern may endeavour to hide it.

Seeing that the earth's surface, in Originality in Writing every direction, seems to be composed entirely of stones of all shapes and sizes, only held in place by the roots of the trees, cables of ivy, and long stems of clematis, woodbine, and wild rose, it is little short of a miracle that the water remains above ground; one would expect it to drop into one of the hundreds of openings between the rocks and return to its original home; but water seems, in a curious way, to be much more human than are the rocks around. At times it appears to have a living intelligence, to men have finally judged great, we obknow what it is doing, and to have a purpose in so doing! This spring, like thousands of other mountain runnels, carefully avoids the gaping crevices, skirts its way around cavernous hollows, and manages, with some intuition beyond human com-prehension, to find a safe way on the surface, with solid ground beneath; and it keeps strictly to this course for

some distance, as it journeys valley-wards, with very little deviation from

At each season in turn, it makes some special appeal; but at the end of May the brook in the meadow is probably at its loveliest. Being full after the winter rains, and no longer kept to a rigid course by rocky walls, it spreads itself lavishly beyond its proper channel, distributing favours in all directions. You may not detect its ever-rippling waters, so luxuriant are the grasses, so high the moon so thickly strewn the crimson-purple orchises and their pale heliotrope cousins with the spotted leaves, with here and there a spike of the fragile white Butterfly Orchis; but you may read an announcement of its presence, written in clear, unmistakable lettering, if you have learnt the language of the open-for hundreds of rose-pink petals are fluttering all over the meadow, like crowds of bright-winged butterfiles; and where the Ragged Robin dances in the wind you may know for a certainty that there is running water somewhere in the neighbourhood.

There are other signs by which you may detect the course of the stream, such as the regiments of bright green rushes, with their tufts of brown these are easily lost sight of in the grasses, whereas the Ragged Robin, when it is in bloom, is like nothing else in the fields, though they crowded with other equally beautiful blossoms. Later on the marsh mint will be in flower; its clumps of blue-mauve blooms being quite a feature

of the brook's progress. But so many flowers love this meadow, and one can't name a half of them—though I think yellows and pinks predominate; it is not so much the flowers one knows, as the flowers one does not know, that give such charm to a little-cultivated meadow that is well supplied with water; there is such a wealth of blossom such opulence, and so many surprises; from the tiniest flowers in the rich under-carpet, to the gossamer heads of the finest grasses, it is one wide array of beauty.—Flora Klickmann, "The Trail of the Ragged Robin."

If we accept the doctrine of criticism today, originality is a great virtue in a writer, and if we believe the book advertisements, all the new writers. The book advertisements all the new writers are posterior or the first time let's have some poetry."—John Erskine, in "The Literary Discipline."

ers as they appear, and as they reappear, have this virtue to a striking, even to an explosive extent. But with all their originality, some of the new books turn out to be dull, and if we books turn out to be dull, and if we air have they, reconsider for a moment the books Marsh marigolds a-wading where the serve that they were rather destitute

"In poetry, a new cadence means a new idea," wrote the imagist some In many a rarer place they might have time ago, defending the use of free shown their face, verse. The doctrine was in the interest of the cadence, but it implied something larger and more significant. that in poetry newness of ideas is desirable. More recently, an American critic remarked, in effect, that what

"By Prayer and Fasting"

him: and the child was cured from It is the refusal to admit material beinability to heal a case the Nazarene where God and His perfect universe or evil) out?" To this Jesus replied in "The First Church of Christ, Scienby charging them with lack of faith, tist, and Miscellany" (p. 222): "When faith, and closing his brief discourse not heal that case, Jesus, the master

This impressive account of the healing power of Truth has a deep signifi- mountain, Remove hence to yonder cance for mankind today. It perfectly place; and it shall remove. Also he illustrates the present power of spiritual understanding to heal the belief of sickness, no less than in that ancient from admitting the claims of the time. It also lays stress upon the importance of faith, and more than hints that cases as serious as that described are relieved through "prayer and fast- Jesus imposed as one of the necessary ing." Thus in this brief discourse Christ Jesus gave a sure means of healing the most difficult case of dis- Christian Science that fasting means, ease,-that is, by "prayer and fasting." Potent words, for they exactly describe the means which perfectly heal every type and form of ill with which mortals believe themselves afflicted.

For those who are desirous of folexpedient to determine just what is meant by "prayer and fasting." Christian Science explains prayer in words so simple that all who desire may understand. On page 12 of "Science and Health with Key to the Scriptures" Mrs. Eddy, in discussing prayer for fasting"! Moreover, it discloses the the sick, says, "It is neither Science nor Truth which acts through blind belief, nor is it the human understanding of the divine healing Principle as manifested in Jesus, whose humble prayers were deep and conscientious protests of Truth,-of man's likeness to God and of man's unity with Truth and Love." His recognition, then, of method. Through the prayer of unman's relation to God, of man's unity with Truth and Love, were his gracious means of healing even the most virulent types of disease,-in this case, even the belief of insanity.

ing the prayer which heals is found in but it regenerates through the destructhe opening paragraph of the Christian Science textbook: "The prayer that reforms the sinner and heals the sick is an absolute faith that all things are possible to God,-a spiritual understanding of Him, an unselfed love.' Here faith and spiritual understanding. knowledge of the truth about God and man, are the chief factors in healing both sickness and sin. Is it not perfectly clear, then, that the healing prayer of understanding is the effica-

his literary portraits is nothing but in his, and since Mr. Bradford's portraits came first, they should have the credit and the praise which an undiscriminating world bestows on Mr. Strachey's. If the question of priority is raised in this kind of writting, perhaps something should be said for Plutarch; but are we sure we should raise the question of priority What arrests us in the remark of the American critic is the undebated assumption that literary excellence de-rives from doing something before somebody else does it. Is it the business of art to discover new ideas, or indeed to busy itself much with any ideas, as separated from emotion and the other elements of complete experience? Is it the originality of genius in art to say something no one has ever thought of before, or to say something we all recognize as impor-tant and true? As for the mere question of priority, even stupid things have been said for a first time; do we wear the laurel for being the first to say them? One suspects that the new cadence

will persist in poetry only if we like it, and that Mr. Bradford's reputation will outstrip Mr. Strachey's only if we prefer what he wrote, and if by chance we care for neither, then both will be neglected, though one preceded the other by a hundred years. Excellence is the only originality that art considers. They understand these things better in France. There the young poet even of the most radical will respect the bias of art toward continuity rather than toward novelty, toward the climax rather than its beginning; his formula of self-confidence will be, "Victor Hugo was a great poet, Alfred de Musset was a great poet, and now at last I'm But in America the parallel here." gospel is, "Poor Tennyson couldn't write, no: Longfellow, of course; now

Frances Crosby Hamlet.

To THE gospel of Matthew there is clous means of destroying the false related the story of a man who came beliefs manifested as sickness?

Another factor enters into the Maswhom he declared to be "lunatick."
He told the Master how he had taken him to the disciples, but they had failed to heal him; and now in his distress he had come to Christ Jesus himself, beseething his aid. "And leaves repulsed the deail." The same repulsed the deail. Jesus rebuked the devil," runs the narrative, "and he departed out of from certain foods at stated periods. that very hour." Then the disciples, lief into consciousness. It is rising manifestly disturbed because of their into the atmosphere of divine Mind, so quickly relieved, asked him, "Why could not we cast him ["the devil," finite. Of this incident Mrs. Eddy says graphically illustrating the efficacy of his disciples asked him why they could with the statement that "this kind Metaphysician, answered, Because of goeth not out but by prayer and your unbelief (lack of faith); and then continued: 'If ye have faith as a grain of mustard seed, ye shall say unto this

senses)." Obviously, Mrs. Eddy saw as a spiritual condition the fasting which Christ conditions of healing a certain type of disease. Furthermore, we learn in primarily, abstention from all the beliefs of the flesh. It is putting off the old man, the belief in a material man, the counterfeit of the true man, who is the reflection and representative of God. It is the denial of the belief in lowing in the Master's footsteps, it is existence apart from God, through recognition of Him as the source of all being and as the only Life which is spiritual.

added: 'This kind goeth not out but

by prayer and fasting' (refraining

In the light of this understanding. how comprehensive becomes the Master's statement about "prayer and means whereby those who really desire to become his disciples, his true followers, may walk in his footsteps. That these means are practicable is capable of demonstration; and Christian Scientists have healed insanity even in what has been regarded as its most hopeless form by precisely this derstanding the victim of false beliefs has been raised into the atmosphere of Spirit, where the false claims of matter disappear. True healing is had wen the belief of insanity.

A very significant statement regarding the prayer which health in this way alone; for not only does it relieve one of the belief of sickness, but it receives the belief of sickness. tion of sin. Both sin and disease are destroyed in the same manner.

THE CHRISTIAN SCIENCE MONITOR

"First the blade, then the ear, then the full grain in the ear"

BOSTON, MONDAY, MAY 28, 1923

EDITORIALS

PROPERLY to consider the report of the American Iron and Steel Institute, favoring the retention of the

Cheap Steel and Tortured Men twelve-hour workday in the steel industry, it is necessary to go back to the fundamentals upon which alone a great industry may be developed with due regard for humane conditions of employment, and for the necessity of finding profit for its

stockholders. In commenting upon conditions in the steel industry, The Christian Science Monitor has more than once expressed hesitancy in entering upon what might seem to be a controversy with Judge Gary, the veteran head of the United States Steel Corporation. We recognize his encyclopædic knowledge of facts bearing upon the problem presented by the need for economical management. We are wholly disinclined to ascribe to him anything except a sincere purpose to make economies in management conform to the primary need for conditions of employment that shall not be brutal and debasing to the employees. And yet we are utterly unable to follow him in his repeated assertions either that the twelve-hour day is necessary to the efficient conduct of the industry, or that it contributes in any way whatsoever to the well-being of those who are forced to endure it.

The grounds upon which the Institute, under Judge Gary's obvious leadership and direction, defends the continuance of the twelve-hour day are:

First, the men want it.

Second, it is neither physically, morally, nor mentally injurious to the employees subjected to it.

Third, if not maintained, it would necessitate finding 60,000 more employees, which is, under the existing immigration laws, impossible.

Fourth, if it were abandoned, the cost of making steel would be increased, and prices to the consumer would have to be raised.

It would seem to the Monitor that the first reason alleged, if true, is nevertheless one that should not appeal to the corporation or to the public. There are many things which men want to do in the pursuit of exaggerated gains which it is distinctly against public policy to permit them to do. It may be true that there are numbers of men, mainly aliens, who are eager to roll up what they think will be a competence in a few years' work in order that they may return with it to their foreign homes. But that is no reason why the menace of the twelvehour day should be maintained as a threat to the wellbeing of all classes of American labor. It is as distinctly the duty of the corporation to prevent its employees from sacrificing their bodies, their minds, and their morals in the pursuit of their own profit as it is its duty to refrain from thus exploiting them to meet its own ends. If the corporation fails to recognize its duty, it should be the part of the State to enforce the more humane conditions.

The second plea is one of fact. It seems clearly opposed to any common-sense view of the matter involved. That men can work for a prolonged period twelve hours a day, much of the time in a heat exceeding 112 degrees, without physical and mental deterioration, is incredible. Moreover, it is not necessary to consider this issue without evidence on which to base a reasonable conclusion. In the report on the steel strike, prepared by the Commission of Inquiry of the Interchurch World Movement, in 1920, the statements of actual workers in the mills are given, and a conclusion is reached by the commission that:

None can dispute the demoralizing effects on family life and community life of the inhuman twelve-hour day. As a matter of arithmetic, twelve-hour day workers, even if the jobs were as leisurely as Mr. Gary says they are, have absolutely no time for family, for town, for church or for self-schooling, for any of the activities that begin to make full citizenship; they have not the time, let alone the energy, even for recreation.

Most unprejudiced persons will believe that this conclusion is in thorough accord both with a humane and a common-sense view of the conditions involved.

So far as the third plea is concerned, it is well to bear in mind that whatever may be its force in the present situation, when there is but little unemployment in the United States, the steel corporations maintained their twelve-hour day just the same during the period of depression immediately following the war, when there were millions of unemployed men in the United States from whom material might readily have been drawn to establish the three-shift system. In view of this historical fact, the effort to defend the twelve-hour day now on the ground of alleged lack of labor can only be regarded as insincere.

And finally, as to the apprehension lest the public might suffer through higher prices were the men treated with normal humanity, it may be conjectured that if higher prices were attainable the steel trust would hardly hesitate to impose them, whether its workers profited thereby or not. But even if a moderate increase in the cost of the finished product were compelled by the establishment of humane conditions of labor, it should be made, and would be submitted to. The great edifice of national industry and prosperity cannot be securely founded upon the tortured bodies of human beings, working under barbarous conditions, and for hours that try the very substance of their bodies and their souls. Nor is it necessary that such a sacrifice should be demanded of any group of men. If the substitution of the threeshift system of eight hours were forced upon the United States Steel Corporation and it did prove to be uneconomical, there would be a very speedy invention and application of labor-saving machinery to do the work now exacted of those whom the employers dismiss cynically as "hunkies." But so long as it is permitted to buy men cheap, and to wear them out remorselessly under conditions of labor which brutalize and degrade, corporations seeking only for profit will not stop to undertake the more expensive process of inventing and installing machinery to do that work.

THE workings of the two-chamber system of parliamentary government were illustrated in an unusual but a perfectly characteristic man-

a perfectly characteristic manner by the French Senate's decision not to sit as a High Court to try Marcel Cachin and his fellow Communists for high treason—a defeat for the Poincaré Government. Ordinarily the French conscript fathers,

in its history.

The French Senate and Poincaré

like their American colleagues, are conservatively inclined, serving as a check on the more radical lower house. One would, therefore, have expected them to accept gladly the chance to sit in judgment over such advanced radicals as the Communists. But though the Cabinet scores only victories in the Chamber of Deputies, the senators decline to appear as champions of military nationalism. Why?

Being elected at different periods and for longer terms, the senators do not represent the same public opinion, the same mood, as the deputies. Before the war, when radicalism was on the forward march, the Senate hardly ever failed to be more conservative than the Chamber, having been elected further back and indirectly, but now while a majority of the senators represent the pre-war state of opinion, the entire Chamber was elected in 1919, when the country was under the spell of military success. Thus it happens that the controlling group in the Senate is radical, while the lower house is ruled by the Nationalist bloc. By-elections since the war have even added Socialist members to the Senate for the first time

This does not mean that M. Poincaré's Cabinet, of which there are more Senate members than is customary, is in any great danger of being overturned in the upper house on a question of confidence or on a major issue, such as the budget or the Ruhr enterprise. Usually it is the Chamber that upsets governments. Only rarely has a cabinet resigned because of an adverse vote in the Senate. But when it comes to serving the Government's political, not to say the Premier's personal, purposes by forming a High Court to try some not very important individuals on such an important charge as high treason, particularly when that charge really means only opposition to the Ruhr occupation—that is an entirely different matter. The Senate's radical majority refuses to accommodate M. Poincaré, even out of "senatorial courtesy."

Twice during the war period the High Court held sessions to try deputies on charges that were essentially political-Louis Malvy and Joseph Caillaux. But, then, it was a patriotic duty. Now the country is in no such danger and much has happened since. M. Malvy is about to return from his five years' exile in Spain and he is very likely to seek vindication by again running for Parliament. The followers of M. Caillaux are every day lifting their heads a little higher. The radical tide is apt to turn back. Why, then, should the senators risk further unpopularity by trying Marcel Cachin, who also has friends and supporters? Since he was put in jail he has become a symbol of the opposition to the Ruhr occupation. Should that venture fail, he may tomorrow become one of the public's idols. Therefore, let the regular assize courts try him. Their judges have no political togas to look after. Such was probably the line of reasoning that led to last Thursday's vote.

The Senate's vote is in no sense an exoneration of the Communists. It is rather an indication that more and more Frenchmen doubt the wisdom of the Poincaré method of dealing with Germany.

ACTIVITIES incident to the World War, combined with the slightly less arduous efforts toward reconstruc-

The Czech Children's Mission tion, have brought the peoples of all parts of the world into much closer contact than they were able to enjoy before necessity united them in common cause. Former racial and social barriers have been removed, permanently it is hoped, and the

way has been opened for continued friendly interchanges among those who have come to realize, somewhat more clearly, the common purpose of all those who are learning to think aright. Gradually old prejudices are being broken down, and there is promise that future generations will realize the obligations of true brotherhood.

The people in the larger cities along the Atlantic seaboard in the United States have recently had the privilege of receiving the message which a little band of children from the new Republic of Czechoslovakia have brought to America, and which, in their own peculiar way, they are endeavoring to broadcast to all the world. It is not a plea couched in the stilted language of political ambassadors. Neither is it made inflammatory and irritating by suggestion of weaknesses in the social or political structures built up by one people and the boasted perfections gained by another. With graces unassumed and with commendable sincerity and simplicity, these boys and girls, pupils in the Bakule School at Prague, have sung their way into the hearts of all Americans who have heard them. Their message has not been misunderstood.

Every thoughtful person who has listened to the simple appeal which these children are making must have been impressed by the unfeigned assurance which they felt in the sincerity of their welcome. They have learned, it is quite apparent, that their friends on the western shore of the ocean are the friends of all liberty-loving peoples. They came, unmistakably, to testify to their own and their country's faith in America's continuing friendship for the builders of new democracies everywhere. They assumed, and correctly, that there is a common bond which binds into one great federation all those nations which are striving to establish human liberty and equal opportunity throughout the world.

These children have shown what the enjoyment of this freedom can do for a race formerly oppressed. Their teacher and mentor has proved what unselfishness and love can accomplish in redeeming the downtrodden. It is the fulfillment of a promise as old as humanity itself. The season of realization and fulfillment knows no particular day or month. From across the seas there has come to the people of America, sung in an alien tongue, the inspiring strains of the anthem, "Peace on earth, good will toward men." In it there are both promise and realization.

May always brings with it—to those who are interested in art—a reminder of the power and popularity

The

Wise

Academy

of the Royal Academy in England, and if those who are interested happen to be Americans, they must wonder why their National Academy does not share its success and importance. The difference does not come from anything in the quality of

the work shown. The Royal Academy, now passing through a phase of repentance, is doing its best to gather together the most distinguished British artists into the fold. But it had cause for repentance. Its Victorian era was one of mediocrity, when the distinction for the artist was not to write R. A. or A. R. A. after his name. And yet it was as powerful then as now, and not less popular. Other reasons must be found for the place it holds and they are not far to seek.

One is that, from the beginning, its affairs have been in the hands of the artists themselves, and another that these artists have made their annual exhibition a social event. They have kept the Academy well before the influential sort of public. Royalty, statesmen, literary men, natural scientists, actors attend its banquet and the speeches there given are secondary in importance only to those heard at the Lord Mayor's banquet in the autumn. To the private view everybody who is somebody in London goes. Nobody would get through the London season creditably who could not say "yes" to the never-failing question, "Have you been to the Academy?" And the result? Look at the London Times for the answercolumns filled with the report of the speeches at the banquet, long lists of people at the private view, one article after another about the exhibition, pages of reproductions of the principal exhibits. The Academy, if it paid in cash, could not have a better advertisement.

The National Academy of Design has also been managed by artists since Morse and his sympathizers seceded from the American Academy of Arts. But its policy, especially of late, has not been that of the Royal Academy. One might think it shunned notice and recognition. It has no banquet to which dignitaries of state are bidden, no more is made of its private view than that of any other society, if as much; nor do the newspapers spare it greater space and the critics greater consideration. It gives two exhibitions annually, but neither can with truth be called a social event. It has not even a gallery of its own, while it admits so many members that to be one of them carries no rare distinction with it. The individual who does not take himself seriously will not be taken seriously by his neighbors. And so it is with academies. The National Academy is not without its opportunities: it has but to follow the example of the Royal Academy in England to become as strong and powerful in America.

Editorial Notes

In the face of the demands of the bricklayers of New York for an additional increase in wages, backed up by the threat of a strike which would tie up \$200,000,000 worth of construction within a month, a comparison of the cost of construction, at present wages, translated into food, at the prices the farmer gets, which was recently printed in The New York Herald, assumes unusual interest. The following examples were included:

It takes 63½ dozen, or 762, eggs to pay a plasterer for one day of eight hours work.

It takes 17½ bushels of corn, or a year's receipts from half an acre, to pay a bricklayer one day.

It takes twenty-three chickens weighing three pounds

each to pay a painter for one day's work in New York.

It takes forty-two pounds of butter, or the output from fourteen cows, fed and milked for twenty-four hours, to pay a plumber \$14 a day.

It takes a hog weighing 175 pounds, representing eight months' feeding and care, to pay a carpenter for

one day's work.

The question which involuntarily arises is: Do the plasterer, the bricklayer, the painter, the plumber, and the carpenter give anything like adequate returns for the com-

pensation demanded?

WITH the news that plans for an aerial sleeping car are being examined by British aircraft authorities must come to many the realization that it cannot be long before the airplane takes practically the same place in the experience of the average individual that is occupied by the automobile today. What a vision of the future is conjured up by the description given: a great, slim, metal saloon, like a long, tapering Pullman, so constructed that it can start on the railroad tracks in the ordinary manner and be changed soon after it had been drawn out of the terminal into a spacious airplane, once more to become a railway car on nearing its destination. "And I dipped into the future, far as human eye could see." It would be a rash man who would dare to make such a statement

THERE are other sides to the Chinese picture. The Weekly Review of the Far East, published in Shanghai, carried this advertisement, prominently displayed, in a recent issue: "Ginling College, Nanking. Entrance tests for Ginling College, Nanking, will be given in several cities on June 1. Application for admission to these tests should be made immediately." Ginling is a Christian woman's college—the second to be established in all China.

Moods of Europe

By RAOUL MARTINO

On a dark night of 1917, I entered Plymouth Harbor, England. We had steamed silently along the English shore that afternoon, keenly and anxiously watching for the dreaded submarines. We were relieved when the anchor went down in the darkness of old Plymouth port and we knew we were safe. The next morning the sun rose over a misty sea. All about us were ships of war. High up over the Channel a huge dirigible was scouting. Officers boarded the vessel, scrutinized carefully our passports, asked many searching questions, and at length allowed us to entrain for London. It was war, nothing but war. Every man, every material agency, every movement was in the grip of war.

Recently again I landed at Plymouth. We sailed in at midday. The harbor was alive with merchant ships, only one unit of the navy in sight, a destroyer. I did not see an army officer all the way from Plymouth to London, nor even in London. Before leaving the steamer, civilian officials barely glanced at passports, stamped them and smiled us on our way. One of them asked if I was buying much in England this trip. He was on his tiptoes for business. In the train there was no word of war. The Oxford-Cambridge race, Dean Inge's religion, the significance of Lady Astor's victory in Parliament, Labor's program—these were the topics of conversation.

The London dailies were carrying as usual the news of the world. In this news the possibility of a clash in the Near East and the grave perils of the French in Germany were conspicuously discussed, but the main emphasis was on matters of peace. One had the impression that today England is carrying on as faithfully for peace as it did for victory in the great war. Business houses were advertising their goods by presents to the high contracting parties in the Royal House wedding. A great church congress was in session, declaring solidly for international peace and suggesting lines of procedure. Representative Labor leaders were meeting Labor leaders of other countries in the interests of extensive co-operation for the peace, happiness and rebuilding of the civilization of Europe. The memory of the war remains, but the bitterness of the war is gone. "How can we strengthen the League of Nations or any other institution that gives promise of promoting better understandings among the nations, the reasonable mind in the handling of the conflicting interests"—this is England in the present hour.

Stepping ashore at Calais, I was conscious at once of a different atmosphere. The porter who carried my luggage said business was slack. In the town little was doing. There were many officers about. There was the same old poilu with his gun. The passport was still a matter of consequence. On the run to Paris, soldiers were much in evidence. Civilians talked excitedly and usually angrily about the boches and looked at the American travelers as if they were to blame for the whole wretched business. Perhaps they didn't think so—but they looked that way. In the diner an intelligent Frenchman said with considerable heat that he liked Poincaré, because he had the nerve to stand up to England. He was sure the Ruhventure would succeed, anyway it would tar the Germans with their own brush.

I recalled a journey I made from Paris to Bordeaux in the spring of 1918. The Germans were making their last great offensive. The situation for the Allies was desperate. All France was glorified with the spirit of consecration. One saw and felt a supreme heroism in France. A great ideal possessed them. Under its spell they were supermen. That was five years ago. Time has changed many things and certainly it has changed France. One remembers that France has suffered, suffered without measure. Many will hold that France is fully justified in all its present thinking and doing. But it does not appear so beautiful in its robes of hate and revenge. Its hoarse cry of blood dismays many a friend.

The trains were crowded with passengers, journeying to Rome for the Easter season. Spring was everywhere in full drive as we rolled down toward Modane. The well-cultivated fields showed that the peasantry is at work. The beauty and calm of the farm lands were a relief after the rush and cynicism of Paris. It was the same old Modane—riot of tongues, hopeless confusion of luggage, long lines of weary voyagers pressing toward the dark little room where passports are inspected, the smoky restaurant with its bare tables and fly-specked walls.

But the train for Italy pulled out on time. There was a business-like jerk in the engine. The cars were clean. The trainmen were alert. The conductor passed quickly through the train to take up the tickets. Into the stations and out again we went with a snap and precision as amazing as it was refreshing. This was not the Italy of 1921-1922. Then we started when the engineer felt like it and we stopped according to his pleasure. But now it was clear that something had happened in Italy. There were no "roughs" loitering around the stations. Men were at work in the fields and the shops. The whole country seemed to be in hand again and marching.

At Rome the facchino who carried out my luggage accepted the compensation offered and doffed his cap. Incredible! In the streets the policemen were regulating traffic, an extraordinary innovation. On the avenue I noticed liveried equipages of the aristocracy. A company of soldiers marched by carrying at their head the tricolor. All heads were bared.

In the apartment that evening, I asked my old-time Italian friend, "Are you a Fascista?" He replied, "No, but there is no doubt that Fascism saved Italy. Mussolini has destroyed the Communists who were destroying the Patria. He has brought order out of chaos. Once more we are under discipline."

Yes, Italy has discipline. An Englishman or an American would say she has tyranny. The will of one man rules. And yet this one man rules because the mood of the country permits him to rule. The Italian is not a coward and he is a democrat.

Today, however, he is in bondage to one of the most reactionary governments conceivable in this era of human experience. He dare not criticize, he dare not complain. His times and seasons are appointed for him, his days and hours are painstakingly regulated for him. The directors and controllers of the huge machine that enslaves him say foolish things, do stupid things, and he remains submissive, silent.

The nearest I can get to expressing what I feel in Italy at this hour is to say, "the Italian is doing penance." He is voluntarily punishing himself for his political sins of omission and commission in 1920-21 and the consequent social chaos. He feels humiliated that he failed to live up to Manin's insistent claim, "Italy is worthy to be free." He has taken on autocracy as a matter of punishment, penance—the Fascisticall it discipline. By and by he will decide he has done penance long enough, that he has been sufficiently chastened. He and all the Fascisti will once more assert their democracy. And Mussolini will either be a democrat—or will have perished with
